

ALGC Fun FACTS

We've upped our
game to improve
YOURS.

EXPANDED Clubhouse: We're looking good on the inside too!

The clubhouse received an interior space remodeling too, creating an inviting and contemporary guest experience.

65%
FEWER
Bunkers

Skip the beach.

Sand bunkers were reduced from 106 to 37; this decreased the area of sand from 96,550 sf to 33,300 sf, a reduction of 65%!

EXPANDED Greens.

The Course Awakens.

Greens were re-grassed with a newer variety of bent grass. This creates a pure putting surface that stays consistent and true all season.

Great New Look.

All the areas around the greens and tees were re-shaped; nine new greens were constructed, plus all new tees and sand bunkers.

A Little More Aqua

17,000 cubic yards of dirt was moved and the pond areas were expanded by 18,600 sf.

18,600 sf.
More Water.

SMOOTHER Cart Paths

For a smooth ride!

9,370 linear feet of path was added to create continuous cart paths throughout the course, now the rain won't keep you from getting in a round of golf.

NEW JUNIOR Tees

Tee it forward options

The new Green and Gold tees allow golfers of all abilities the chance to play a shorter tee in order to score better and have a more enjoyable round of golf.

Family-friendly

The new Gold tee should allow juniors and beginners the opportunity to play from a tee that gives the chance to reach the green in regulation.

DID YOU KNOW?

ALGC 18-hole golf course originally served as the Nike Missile Base. The property was a citizen-driven effort to acquire the parcel of land from the US Navy in 1976.

GOING GREEN

Over 70 trees were removed due to disease and overgrowth; but 63 NEW trees were added to the property.

BETTER PACE

The routing of the course was reversed; allowing the front nine to have every three holes return to the clubhouse. This allows golfers the opportunity to play the number of holes that time allows for.
