Administration Center
Parking Lot Improvements

Bids are due and will be opened and read aloud on

February 26, 2019 at 1:00 pm at the

Arlington Heights Park District Administrative Offices
410 N. Arlington Heights Road
Arlington Heights, Illinois 60004

February 12, 2019
BID NOTICE

The Board of Park Commissioners of the Arlington Heights Park District, Arlington Heights, Illinois, invites bids for the Administration Center Parking Lot Improvements for the Arlington Heights Park District. The scope of work includes: removal, off-site disposal and replacements of asphalt and concrete for two parking lots according to plans and specifications. Sealed proposals will be received at the Arlington Heights Park District office at 410 N. Arlington Heights Road, Arlington Heights, Illinois until 1:00 P.M., February 26, 2019, at which time bids will be publicly opened.

Bid documents, including Plans and Specifications required for bidding purposes will be available by download from the park district website: www.ahpd.org. There will be a pre bid meeting at the Arlington Heights Administration Center, 410 N. Arlington Heights Road on February 19, 2019 at 10:00 A.M.

All bidders are required to furnish a Bid Bond, Cashier’s Check or Certified Check for 10% of the total base bid amount at the time of bidding. No bids will be withdrawn without the written consent of the Arlington Heights Park District. If a Bid is withdrawn, the Bidder will not be permitted to submit another Bid for the same Project. Only bids in compliance with the provisions of the Bid Documents will be considered. The successful bidder will be required to furnish a satisfactory Performance Bond and Labor and Material Payment Bond for the total contract amount.

This is a Prevailing Wage Schedule project and the contractor and all subcontractors are to pay the prevailing wage for Cook County for the life of the project and are responsible for keeping up with all changes in accordance with the requirements of the Illinois Wages of Employees on Public Works Act (820 ILCS 130/5 with amendments to sections 5, 6, and 11a effective 1/1/2012).

The Board of Park Commissioners of the Arlington Heights Park District reserves the right to reject any or all of the bids on any basis and without disclosure of a reason. The failure to make such a disclosure shall not result in accrual of any right, claim or cause of action by any unsuccessful Bidder against the Arlington Heights Park District. Bids will be considered firm for a period of sixty days (60) days.

By Order Of:
Board of Park Commissioners
Arlington Heights Park District

INSTRUCTIONS TO BIDDERS

A. DEFINITIONS
   The following words and phrases, used herein, shall have the meaning ascribed to them as follows:

   1. "Owner", “Park District” or “AHPD” shall mean the Arlington Heights Park District

   2. "Bidder" shall mean each company, offerer or vendor providing a bid

   3. “Bid” means the price offered by the bidder for the services or project.

   4. "Successful Bidder" or "Vendor" shall mean the Bidder that receives the award of contract from the Owner.

   5. “Director” shall mean the Executive Director of Parks and Recreation of the Arlington Heights Park District or his designated representative.

   6. "Contract Documents" shall mean: (i) these General Conditions and Instructions to Bidders and General Requirements, (ii) including but not limited to all Plans, Specifications and Drawings referenced therein prepared by the Owner, Engineer, Architect or other Consultant; (iii) the Bid Form to be submitted on form furnished in this document, (iv) the Agreement, a copy of which is attached hereto and incorporated herein (the "Agreement"), (v) Performance Bond and Payment Bond or irrevocable letter of credit as described in the Agreement. (may be omitted with Dir. Rea’s approval)

   7. Whenever the term "addenda" appears in any of the Contract Documents, it will be understood to refer to any written or graphic instruments issued prior to the bid opening which modify or interpret the Contract Documents, by additions, deletions, clarifications, or corrections. Addenda will become part of the Contract Documents when the Contract is executed. Changes or corrections may be made by the Arlington Heights Park District to the Contract Documents after they have been issued and before the Bid Opening. In such case, a written addendum describing the change or corrections will be issued by the Park District or Engineer to all bidders on record. Such addendum or addenda shall take precedence over that portion of the documents concerned, and shall become part of the Contract Documents.

B. PROJECT SCOPE

1. The scope of work involves furnishing all of the required labor, materials, equipment, implements, parts and supplies necessary for, or appurtenant to the Administration Center Parking Lot Improvements, in accordance herewith and in accordance with the plans, specifications and drawings February 12, 2019 and any authorized change orders there to which have been signed by both parties hereto, and which are hereby incorporated herein by reference.

2. The Contractor shall commence work no later than May 13, 2019, and perform all work on a regular full-time basis during weekdays and Saturdays until final completion. If weather conditions make it impossible to perform the work, as determined by the Owner, the secondary date to commence work shall be August 7, 2019.
C. PROJECT IDENTIFICATION AND LOCATION

1. Project Identification: Administration Center Parking Lot Improvements

   Project Location: AHPD Administration Center
   410 N. Arlington Heights Road
   Arlington Heights Park District
   Arlington Heights, IL 60004

2. Project Contact: Scott Elman
   Park Planner II
   selman@ahpd.org
   847-506-7144

D. RECEIPT AND OPENING OF BIDS

1. All bids are due no later than 1:00 P.M., February 26, 2019 at 410 N. Arlington Heights Rd., Arlington Heights, IL 60004.

2. The Park District reserves the right to reject any or all bids and to waive any formality or technicality in any Proposal in the interest of the Park District.

3. Any bid received after specified bid opening time will not be considered.

4. Contractor is required to hold total bid price for sixty days (60) calendar days after bid opening.

E. PREPARATION OF BIDS

1. Each bid shall be submitted on the Bid Form furnished in these documents. The bidder shall specify in figures, in the places provided, a price for each of the separate items called for in the proposal forms.

2. All bids must be written in black ink or typewritten, and signed with the legal signature of the Bidder, and enclosed in an opaque envelope, sealed, and clearly addressed as follows:

   **SEALED BID:**  Administration Center Parking Lot Improvements
   Attn: Bid Dept.

   The envelope shall also contain the name and address of the bidder. The Park District will not be responsible for premature opened envelopes that are not properly marked.

F. EXAMINATION

1. Each bidder shall first examine the site(s), taking into consideration all such conditions that may affect this work. A submission of a proposal implies that this examination has been made. If the bid is accepted, the Bidder will be responsible for all errors in its bid resulting from its failure or neglect to comply with these instructions. The Arlington Heights Park District will not, in any case, be responsible for any change in anticipated profits or any unanticipated losses resulting from such failure or neglect.
2. Before submitting a Proposal, the Bidder shall carefully examine the Project Documents and Plans, visit the site of work, fully inform themselves of all existing conditions and limitations, and include in the Proposal a sum to cover the cost of all items included. The Bidder shall make intelligent observations and inquiry as to conditions at the Project Site. No pleas of ignorance, oversight or miscalculation of the conditions prevailing shall suffice to permit withdrawal of a Proposal submitted or to invalidate the Contract or Bond after its execution.

3. The Project Manager will be available to review the project site and project scope, at the bidders request.

4. There is a voluntary pre-bid meeting for this project on February 19, 2019 at 10:00 A.M. at the Administration Center, 410 N. Arlington Heights Road.

G. QUALIFICATIONS OF BIDDER

The Park District may take action deemed necessary to investigate the qualifications of each bidder. Each bidder shall complete the Affidavit of Experience form in these Bid Documents and submit such form with the bid form. The Park District reserves the right to qualify or disqualify bidders as a result of lack of similar project experience and/or any other information obtained from the affidavit of experience form.

H. ADDENDA AND INTERPRETATION

1. All inquiries and requests for interpretations of the Bid Documents shall be made in writing no later than 1:00 P.M., February 20, 2019. If deemed necessary, response(s) to inquiries and interpretations shall be completed and sent to bidders in the form of addenda no later than 4:00pm, February 22, 2019.

2. Any addenda shall become part of the Contract Documents.

3. Any addenda must be acknowledged by the bidder and shall become part of the Contract Documents.

I. CONTRACT DOCUMENTS

The Bidder to whom the project is awarded will be required to enter into a contract with the Arlington Heights Park District for the extent of the work and contractual amount until the completion of the agreed work. The awarded Bidder will be required to enter into a contract with the Park District within ten (10) days after acceptance of the bid price.

J. BOND REQUIREMENTS

1. Bid Bond/Bid Security - The Bidder shall submit with his bid, a Bid Bond, Cashier's Check or Certified Check in an amount not less than 10% (ten percent) of the amount of Total Base Bid.

   a. The bid security shall be made payable to the Arlington Heights Park District, and shall be attached to the proposal.

   b. Should the Bidder fail or refuse to enter into the agreement and furnish an acceptable bond within ten (10) calendar days after notification of acceptance of the Bidder's
proposal by the Arlington Heights Park District, the bid security shall be forfeited and become the property of the Arlington Heights Park District.

c. In the case of the Successful Bidder, the bid security will be retained by the Park District until receipt of all contract paperwork.

d. All bid securities will be returned to Unsuccessful Bidders upon request, following the receipt of all contract paperwork of the Successful Bidder.

2. Performance Bond - If a bid is accepted, a performance bond, payable to the Arlington Heights Park District, for not less than one hundred (100%) percent of the contract amount.

3. Labor & Material Bond - If a bid is accepted, a Labor & Material Bond, payable to the Arlington Heights Park District, for not less than one hundred (100%) percent of the contract amount will be required prior to begin services.

K. SUBMITTAL OF PLANS AND SPECIFICATIONS

1. Before commencing work, the Contractor shall submit for approval three copies of the manufacturer's information covering all materials and equipment that he proposes to furnish. The Contractor shall commence no work nor purchase any materials prior to the approval of the submittals except at the Contractor's risk. Approval of the submittals by the Owner shall not be considered a waiver of any provisions of the specifications nor shall they be construed to permit a waiver from any of the performance criteria required at the final inspection.

2. Submittals may not be required for all projects or services, and will be determined by the Owner and Contractor at a pre-construction and/or pre-services meeting.

L. MATERIALS

All materials supplied by the Contractor under the provisions of these Specifications and Plans shall be new materials of the kind and character called for. Defective equipment or material damaged in the course of installation or tests shall be replaced or repaired in a manner satisfactory to the Owner. All material and equipment to be furnished under these Specifications shall be the standard product of a manufacturer regularly engaged in the production of such material and shall be the manufacturer's current standard design.

M. SUBSTITUTION OF MATERIALS

The materials specified have been determined to have the characteristics appropriate for the purpose of the project. In the event, however, the clause "or equal" is used in the Specifications pertaining to the material or article, the use of an alternate article other than that specified must be submitted for written approval of the Owner or his representative not less than three business days prior to bid. Bids which propose to use a non-approved alternate will be rejected. The Owner reserves the right to reject any or all bids.

N. AWARDING OF CONTRACT

1. It is anticipated that a recommendation will be presented to the Board of Commissioners for approval at the regularly scheduled Park Board Meeting, March 12, 2019. The Arlington Heights Park District reserves the right to review all bids submitted for a period of sixty (60)
days after the bid due date, and by submitting a bid, the Bidder agrees that the amount specified in its bids shall remain in full force and effect for such sixty (60) day period. No Bidder shall modify, withdraw, or cancel its bid, or any part thereof, for sixty (60) days after said bid due date, and no attempted modification, withdrawal, or cancellation shall be valid.

2. Award, Rejection or Negotiation of Bids – The contract will be awarded to the lowest responsible and responsive Bidder complying with all the provisions of the General Conditions and Instructions to Bidders, provided the bid price is reasonable and it is to the interest of the Arlington Heights Park District to accept it. The Arlington Heights Park District reserves the right to reject the bid or a Bidder who (a) has previously failed to perform properly or complete on time contracts of a similar nature, (b) when investigation shows that the Bidder is not in a position to perform the contract, (c) is delinquent on any state or federal taxes, (d) is barred from bidding on this contract or any other contract pursuant to 720 ILCS 5/33E-3 and 720 ILCS 5/33E-4 and/or (e) is not actively engaged in work of similar size, scope and complexity as the Project Work and/or has not satisfactorily completed the minimum project work set forth herein.

3. Notwithstanding the foregoing, the Arlington Heights Park District also reserves the right to reject any or all bids and to waive or not to waive any irregularities, informalities or variances therein, or to accept any bid considered by the Arlington Heights Park District to be in the best interest of the Arlington Heights Park District. The Owner also reserves the right to accept all or part of a bid when the Arlington Heights Park District Park Board of Commissioners determines that it is in the best interest of the Arlington Heights Park District.

O. BASIS OF PAYMENT

1. Contractor shall submit a Pay Request/Invoice within ten (10) days following the end of each month and the Park District will make payment within ten (10) days after submittal of a payment request for all work performed in accord with the contract during the period.

2. Pay Requests/Invoices will be reviewed by the Owner, and the Contractor will not be paid for any weeks in which no services are rendered with respect to a particular location.

3. Payment will be made to the Contractor within thirty (30) days of completion and acceptance of the project by the Park District. As required by the IRS, a **W-9 Request For Taxpayer Identification Number and Certification Form** must be submitted to the accounting department prior to releasing payment for the project. In addition, a **Vendor Application** is required and will be furnished to the awarded contractor of this project.

P. RETAINAGE

The Park District shall retain 10% of every payout until the project is completed and the final payout is made.

Q. TAXES

This work is being done under the auspices of the Arlington Heights Park District and therefore is exempt from the Illinois sales tax and the Regional Transportation Authority sales tax. The proposal shall not include any costs for these taxes.
R. DELIVER CHARGES

All bid prices should include both shipping and delivery charges. These charges shall be freight (F.O.B.) to the Park District. Delivery should be to a desired point within the Park District unless otherwise stated in the call for bids. Any variation from the advertised terms should be clearly stated in the Bidder's proposal.

S. GOVERNING LAWS AND REGULATIONS

The Bidder to whom the work is awarded shall perform all work and use only those materials that conform to city, state and federal codes regarding health, safety and welfare. The Arlington Heights Park District shall be held faultless for failure of work and material that does not conform to such codes. The Contractor shall comply with Equal Opportunity clause required by the Illinois Fair Employment Practices Commission.

T. OWNERSHIP OF PLANS AND SPECIFICATIONS

1. All Plans and Specifications and copies thereof, furnished by the Owner, are his property. They are not to be used on other work, and with the exception of one complete set, are to be returned to him on request at the completion of the Contract work.

2. No plan deposit or plan fee will be required to submit a bid for this project.

3. The Plans, Specifications, Special Conditions and Proposal Form are intended to include all job items necessary to properly complete the work. If, through inadvertence or otherwise, the Plans or Specifications omit to require any work necessary for such completion, the Contractor shall, nevertheless, be required to perform such work. Plans and Specifications are intended to be consistent with one another and with other portions of the Contract. Work or materials called for by the Plans and not mentioned in the Specifications, or vice-versa, shall be performed in as faithful and thorough manner as though fully covered by both.

U. CHANGES OR ALTERATIONS OF CONTRACT WORK

1. The Owner reserves the right to alter the services by adding to or deducting from the original quantities as bid without invalidating the Contract. All such work shall be executed under the original conditions for the original contract, except for an extension in time caused by any such changes or alterations.

2. If the Contractor claims that any instructions, by drawings or otherwise, involve extra cost under this agreement, he shall give the Park District written notice therefore and obtain written approval of the extra before proceeding to execute the work. No such claim shall be valid and no payment for extra work shall be made unless the extra is approved in writing by the PARK DISTRICT.

3. The value of any change shall be determined by one or more of the following methods:

   a. By an approved Lump Sum;

   b. By Unit Prices given in the Contract or subsequently agreed upon;

   c. Time and Material plus percentage. This method of cost shall be used on the Contractor's actual costs for time and material plus 20% for Contractor's
overhead and profit. Contractor's actual costs shall be the direct costs for labor, payroll taxes, materials and equipment.

V. OMISSIONS AND DISCREPANCIES

Should a Bidder find discrepancies in, or omissions from bid documents, he should at once notify the Arlington Heights Park District which may send a written instruction to all Bidders. No oral interpretation by the Park District will be binding; only instruction in writing will be deemed valid. To receive consideration, requests for interpretation must be made no later than three working days prior to the date set for receipt of bids.

W. SPECIFICATION OR INFORMATION CONFLICTS

Should any Specifications, Information, Directives, Notes, Tags or Provisions contained in the Construction Documents or Technical Specifications conflict with any other Specifications, Information, Directives, Notes, Tags or Provisions contained in the Construction Documents, then the more stringent Specification, Information, Directive, Note, Tags or Provision shall apply.

X. COLLUSIVE BIDDING

The Bidder represents and warrants that its bid is made without any previous understanding, agreement or connection with any person, firm or corporation making a bid for the same Project Work; without prior knowledge or competitive prices; and is in all respects fair, without outside control, collusion, fraud or otherwise illegal action.

Y. PROGRESS MEETINGS

The Contractor shall be required to provide an opportunity for the Owner to attend appropriate progress meetings, with the Contractor [Project Foreman] and Owner. These meetings will review work schedules, progress, upcoming work and coordination with the Owner. Meetings may take place on daily, weekly or monthly basis, as determined by the Contractor and Owner prior to the start of services.

Z. PREVAILING WAGES

This contract calls for the construction of a “public work,” within the meaning of the Illinois Prevailing Wage Act, 820 ILCS 130/.01 et seq. (“the Act”). The Act requires contractors and subcontractors to pay laborers, workers and mechanics performing services on public works projects no less than the “prevailing rate of wages” (hourly cash wages plus fringe benefits) in the county where the work is performed. For information regarding current prevailing wage rates, please refer to the Illinois Department of Labor’s website at: http://www.illinois.gov/idol. All contractors and subcontractors rendering services under this contract must comply with all requirements of the Act, including but not limited to, all wage, notice and record keeping duties.

1. The general prevailing rate of wages in the locality for each craft or type of worker or mechanic needed to execute the contract or perform the work, and the general prevailing rate for legal holiday and overtime work, as ascertained by the park district or the Illinois Department of Labor shall be paid for each craft or type of worker needed to execute the contract or to perform such work and it shall be mandatory upon the Contractor to whom the contract is awarded and upon any subcontractor under him to pay not less than the specified rates to all laborers, workers and mechanics employed by them in the execution of the contract or such work.
2. It shall be mandatory upon the contractor to whom a contract for public works is awarded to post, at a location on the project site of the public works that is easily accessible to the workers engaged on the project, the prevailing wage rates for each craft or type of worker or mechanic needed to execute the contract or project or work to be performed. A failure to post a prevailing wage rate as required by this Section is a violation of the Act.

3. A listing of wages for Cook County Illinois Department of Labor’s website at: http://www.illinois.gov/idol/Laws-Rules/CONMED/Pages/Rates.aspx. It is the sole responsibility of the Contractor to whom the contract is awarded to pay not less than the specified rate of labor published by the Department of Labor at the time of the work.

4. The Owner may at any time inquire of the contractor as to rates of wages being paid to employees of the contractor, any subcontractor or material men, where upon such information shall be promptly provided to the Owner. A certified payroll transcript, in accordance with the Illinois Prevailing Wage Act, shall be submitted with their waiver of lien with each payout request.

AA. CERTIFIED PAYROLL

While participating on public works, the Contractor and each subcontractor shall:

1. Make and keep, for a period of not less than 3 years, records of all laborers, mechanics, and other workers employed by them on the project; the records shall include each worker’s name, address, telephone number when available, social security number, classification or classifications, the hourly wages paid in each pay period, the number of hours worked each day, and the starting and ending times of work each day.

2. Submit monthly, in person, by mail, or electronically a certified payroll to the Arlington Heights Park District. The certified payroll shall consist of a complete copy of the records identified in paragraph (1.) of this subsection (AA.) but may exclude the starting and ending times of work each day. The certified payroll shall be accompanied by a statement signed by the Contractor or subcontractor which avers that: (i) such records are true and accurate; (ii) the hourly rate paid to each worker is not less than the general prevailing rate of hourly wages required by the Prevailing Wage Act; and (iii) the Contractor or subcontractor is aware that filing a certified payroll that he or she knows to be false is a Class B misdemeanor.

BB. PERMITS AND LAWS

The Contractor shall be responsible for obtaining any and all County, State and Village of Arlington Heights Permits, Licenses, Bonds, or other permits which may be required. The Contractor shall at all times observe and comply with all Federal, State and Local Laws, regulations and ordinances which, in any manner, affect the conduct of his work. Any complaint, claim, or action brought against the Contractor for failing to observe or comply with any law, ordinance or regulation shall be the sole responsibility of the Contractor and shall in no way extend to or expose the Park District to liability and the Contractor shall indemnify and hold harmless the Park District from any and all such complaints, claims or actions. Before beginning work, the Contractor shall obtain from the proper officers all permits and licenses, pay all charges and fees, and give all notices necessary and incident to the due and lawful prosecution of the work.
CC. WORKING HOURS

The Contractor will be allowed to schedule his normal work between the hours of 7:00 a.m. and 6:00 p.m., Monday through Friday. Work during other hours will be allowed only on an emergency basis and as authorized by the Park District. The Contractor will be allowed to commence immediately upon May 13, 2019 provided that agreement documents and issuance of all pertinent permits have been received.

DD. LIENS

The final payment shall not be due until the Contractor has delivered to the Park District a complete release of all liens or claims for lien arising out of this Contract, or at the election of Park District, receipts in full covering all labor and materials for which a lien could be filed, or a bond satisfactory to the Park District indemnifying him against any lien.

EE. INSURANCE

1. Contractor shall maintain throughout the agreement, as a minimum, the following insurance policies set forth by PDRMA and contained in its entirety on Attachment AI.

2. The District shall be named as additional insured under the commercial general liability coverage. This insurance shall apply as primary insurance. Any other insurance or self-insurance maintained by the District shall be in excess of the Contractor's insurance and shall not contribute with it.

3. The Contractor awarded the bid shall furnish to District one (1) copy of certificate of insurance made in favor of the Arlington Heights Park District and the Contractor.
OBLIGATIONS OF SUCCESSFUL BIDDER

1. The successful bidder shall abide by and comply with all applicable local and state laws relating to fair employment practices and prohibiting discrimination in contracts involving public funds or the construction or development of public buildings, works or facilities.

2. The successful bidder shall abide by and comport with all local and state laws relating or pertaining to the development and/or construction of public works, buildings or facilities, including but not in any manner limited to any and all applicable workmen's compensation acts or laws.

3. The successful bidder must comply with the provisions of the Illinois Human Rights Act ("Act") dealing with equal employment opportunities (Section 2-105, 775 ILCS 5/2-105), including equality of employment opportunity and the regulations of the Department of Human Rights of the State of Illinois and also must provide for the adoption and implementation of written Sexual Harassment Policies. The contract with the successful bidder will provide for this requirement. The statutory provisions setting forth what such policies shall include as a minimum under the Act are on file with the District and available to the bidder upon request.

4. The successful bidder must comply with the provisions of the Illinois Substance Abuse Prevention on Public Works Act
Sealed bids will be received by the Arlington Heights Park District until 1:00 P.M., February 26, 2019 and then publicly opened for furnishing the following supplies and/or services to be delivered in accordance with the following instructions:

Bid Opening at:  Arlington Heights Park District Administration Center  
410 N. Arlington Heights Road  
Arlington Heights, IL 60004

The Contractor shall commence work no sooner than May 13, 2019, and perform all work on a regular full-time basis during weekdays until final completion.
A. ACKNOWLEDGEMENTS/CHECKLIST

1. Receipt of Documents: Bidder has received a complete set of specifications and plans and understands the meaning of their content, and shall willingly comply with the guidelines set forth in these documents.

   □ Yes    □ No

2. Identification of Documents Received: The following is a checklist of documents that should appear in the Bid Documents. Please complete the checklist and contact the Park District if any of the documents have been omitted.

The undersigned as a Bidder declare that he/she has carefully examined the plans and specifications, including the detailed drawings and specifications and all instructions and statement of requirements, and that he/she is fully familiar therewith: and having carefully examined the site and completely familiarized with local conditions affecting the cost of the work: hereby states that he/she will provide all necessary labor, equipment, tools, machinery, apparatus and all other means of construction, do all the work and furnish all materials, called for by said plans and specifications in the manner prescribed by in accordance with the requirements of the contract, specifications and drawings for the construction of this project in Arlington Heights, Illinois as prepared by the Arlington Heights Park District: and will accept as full and complete payment therefore the base bid amount which is the summation of the cost of the items of work and is equal to the summation of the total of the unit prices in the amount as listed herein. The quantities indicated below are approximate and intended as a guide for bidding purposes. These agreed to unit prices are being provided should field conditions, as determined by the engineer and park district representative, require an increase or decrease in the scope of project work. The Contractor is responsible for all CPSAC, ASTM, Village of Arlington Heights and State of Illinois regulations that ensure the proper and safe installation of the pavement. The Arlington Heights Park District reserves the right to eliminate sections of this bid, which is not favorable to its best interest. The contractor shall field verify the location and depth of buried site utilities prior to starting this project. Substitution of a product material of like quality by another manufacturer/supplier as an equal or better must receive written approval from the owner no less than five work days before bids are due. In writing, the owner will notify the requester and all other bidders of the additional approved items. Field adjust where needed upon written approval of owner.

H. WRITTEN SEXUAL HARASSMENT POLICY CERTIFICATION

The undersigned, on behalf of the entity making this proposal or bid, certifies that a written sexual harassment policy is in place, pursuant to Public Act 87-1257, effective July 1, 1993, 775 ILCS 5/2-105 A).

This Act has been amended to provide that every party to a public contract must have a written sexual harassment policy that includes, at a minimum, the following information:

1. The illegality of sexual harassment;
2. The definition of sexual harassment, under State law;
3. A description of sexual harassment, utilizing examples;
4. The vendor’s internal complaint process including penalties;
5. The legal recourse, investigative and complaint process available through the Department of Human Rights and the Human Rights Commission;
6. Directions on how to contact the Department and Commission;
7. Protection against retaliation as provided by 6-101 of the Act.

IT IS EXPRESSLY UNDERSTOOD THAT THE FOREGOING STATEMENTS AND REPRESENTATIONS AND PROMISES ARE MADE AS A CONDITION TO THE RIGHT OF THE BIDDER TO RECEIVE PAYMENT UNDER AND AWARD MADE UNDER THE TERMS AND PROVISION OF THIS BID.

I. LEGAL COMPLIANCE AND INSURANCE AGREEMENT

THIS AGREEMENT entered into by and between ______________________________, hereinafter referred to as “Bidder” and Arlington Heights Park District, hereinafter referred to as the “Owner” or “District”.

WHEREAS, Bidder may be performing work (“Work”) under one or more contracts with the District, entered into or to be entered into from time to time, which Work will be performed on and/or off premises of the Owner and said Bidder may have subcontractors and/or one or more employees engaged in the performance of the Work.

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, and other good and valuable consideration received and to be received, the Bidder hereby agrees:

1. To comply with all applicable laws, regulations and rules promulgated by any federal, state, county, municipal and/or other governmental unit or regulatory body now in effect or which may be in effect during the performance of the Work. Included within the scope of the laws, regulations and rules referred to in this paragraph but in no way to operate as a limitation are all forms of traffic regulations, public utility and intrastate and Interstate Commerce Commission regulations, worker’s compensation laws, prevailing wage laws and the Social Security Act of the federal government and any of its titles, the Illinois Department of Human Rights, the Illinois Human Rights Commission, or Equal Employment Opportunity Commissioner statutory provisions and rules and regulations.

2. To protect, indemnify, hold and save harmless and defend the Owner, its public officials, employees, volunteers, and agents against any all claims, loss, judgments, liabilities, actions, damages, injuries and expenses, including but not limited to attorney’s fees, incurred by reason of any lawsuit or claim for compensation arising in favor of any person, including but not limited to the employees, officers, or independent contractors of subcontractors of the Bidder or Owner, an account of personal injuries or death, or damage to property occurring, growing out of, incident to, or resulting directly or indirectly from the performance of the Work by the Bidder or any of its subcontractors, whether such loss, damage, injury or liability is contributed to by the negligence of the Owner or by premises themselves or any equipment thereon, whether latent or patent, or from other causes whatsoever, except that the Bidder shall have no liability for damages or the cost incident thereto caused by the sole negligence of the Owner.

3. To keep in force, to the satisfaction of the Owner, at all times during the performance of the Work referred to above, Commercial General Liability (CGL) Insurance and if necessary, Commercial Umbrella Insurance with a limit of not less than $1,000,00 each occurrence. If such CGL insurance contains a general aggregate limit, it shall apply separately to this project/location. Automobile Liability Insurance with bodily injury, personal injury, and property damage limits of not less than $2 million per occurrence and $2 million annual aggregate, and worker’s compensation and related insurance coverage at amounts required by statute, and employer’s liability insurance with limits of not less than $1,000,000. The Bidder agrees that prior to Work commencing, proof of such insurance coverage will be submitted to the Owner. There shall be no additional charge for said insurance to the Owner.

The Bidder shall furnish certificate of insurance for the insurance coverage required herein, naming the Owner, its public officials, employees, volunteers, and agents as additional insured and providing that such policies may not be cancelled or amended without 30 days prior written notice having been given to the Owner. The policies shall also contain
“contractual liability clauses.” The policies shall have no exclusions that would conflict with the project being bid. Any deductibles over $10,000 will be disclosed at the time of bid submission to the Owner. All limits required will be specific to the project bid. Bidder shall include all subcontractors as insured under its policies or furnish separate certificates. Coverage afforded the Owner, its officials, employees and volunteers as insured applies as primary, and not excess or contributing to any insurance issued in the name of the Owner. Finally, the Bidder agrees to waive any rights of subrogation. Coverage shall be at least as broad as 1988 ISO CGC Form or equivalent, ISO Business auto coverage form No. CA 0001 0187 covering automobile liability workers compensation employees’ liability, as required by the State of Illinois.

If any policy is written on a claims-made basis, then the Bidder shall purchase, prior to commencement of the Work, such additional insurance as may be necessary to provide specified coverage to the Owner for a period of not less than five years from the termination of this agreement.

4. To furnish any affidavit or certificate, in connection with the Work to which this agreement pertains, as provided by law.

5. To indemnify Owner, its public officials, employees, volunteers, and agents for any loss, Bidder may sustain by reason of theft or other cause or from the acts or negligence of the employees of the Bidder or of its subcontractors.

IT IS MUTUALLY UNDERSTOOD AND AGREED that the Bidder shall have full control of the ways and means of performing the work referred to above and that the bidder or his/its employees, representatives or subcontractors are in no manner employees of the Owner. The bidder and any party employed by the Bidder are independent contractors.

This Agreement shall be effective upon acceptance by Owner of any bid from Bidder and shall continue unless and until mutually terminated in writing by an instrument in writing signed by both Bidder and Owner.

IN WITNESS WHEREOF, THE PARTIES have executed this agreement

J. ILLINOIS DRUG FREE WORK PLACE STATEMENT

The bidder acknowledges its obligations under the Illinois Drug-Free Workplace Act and certifies it will provide a drug-free workplace by publishing a statement that includes:

1. Notify employees that the unlawful manufacture, distribution, dispensation, possession or use of a controlled substance is prohibited in the work place;

2. Specifying the actions that will be taken against employees for violating this provision;

3. Notifying the employees that, as a condition of their employment to do work under the contract with the Arlington Heights Park District, the employee will:
   a) Abide by the terms of the statement;
   b) Notify the undersigned of any criminal drug statute conviction for a violation occurring in the work place not later than five (5) days after such a conviction;

4. Establishing a drug free awareness program to inform employees about:
   a) The dangers of drug abuse in the work place;
   b) The policy of maintaining a drug-free work place;
   c) Any available drug counseling, rehabilitation or employee assistance program;
   d) The penalties that may be imposed upon an employee for drug violations;

5. The undersigned shall provide a copy of the required statement to each employee engaged in the performance of the contract with the Arlington Heights Park District, and shall post the statement in a prominent place in the work place;

6. The undersigned will notify the Arlington Heights Park District within ten (10) days of receiving notice of an employee’s conviction;

7. Make a good faith effort to maintain a drug free work place through the implementation of these policies;

8. The undersigned further affirms that within thirty (30) days after receiving notice of a conviction of a violation of the criminal drug statute occurring in the work place, he shall:
   a) Take appropriate action against such employee up to and including termination; or
   b) Require the employee to satisfactorily participate in a drug abuse assistance or rehabilitation program approved for such purposes by a federal, state, or local health, law enforcement, or other appropriate agency;
IT IS EXPRESSLY UNDERSTOOD THAT THE FOREGOING STATEMENTS AND REPRESENTATIONS AND PROMISES ARE MADE AS A CONDITION TO THE RIGHT OF THE BIDDER TO RECEIVE PAYMENT UNDER ANY AWARD MADE UNDER THE TERMS AND PROVISIONS OF THIS BID.

K. SUBSTANCE ABUSE PREVENTION FORM

The Substance Abuse Prevention Act, Public Act 95-0635, prohibits the use of drugs and alcohol, as defined in the Act, by employees of the Contractor and by employees of all Subcontractors while performing work on a public works project. The Contractor/Subcontractor herewith certifies that it has a superseding collective bargaining agreement or makes the public filing of its written substance abuse prevention program for the prevention of substance abuse among employees who are not covered by a collective bargaining agreement dealing with the subject as mandated by the Act.

A. The undersigned representative of the Contractor/Subcontractor certifies that the contracting entity has signed collective bargaining agreements that are in effect for all of its employees, and deal with the subject matter of Public Act 95-0635.

L. PREVAILING WAGE ACT, AS AMENDED, EFFECTIVE JANUARY 1, 2010

The undersigned, on behalf of the entity making this proposal or bid, certifies that a written prevailing wage notification policy is in place, pursuant to Illinois Prevailing Wage Act, 820 ILCS 130/1 et. seq. requiring that all laborers, workers, and mechanics employed by the Park District, or on its behalf, for the public works projects, be paid not less than the general prevailing wage. This applies to contractor and any sub contractor working on the project. This Act was amended January 1, 2010 to provide that every party to a public contract where labor is involved be notified of the requirement for paying prevailing wage and submitting certified payroll. The prevailing rate of wages are revised by the Department of Labor and are available on the Department’s official website: http://www.illinois.gov/idol/Laws-Rules/CONMED/. The Act includes, at a minimum, the following:

1. The notification to contractors of the prevailing wage requirement on all public works projects.
2. The collection by Park District of certified payroll for all laborers including those hired by contractors.
3. It is the contractor’s responsibility to inform laborers of prevailing wage rates.
4. It is the contractor’s responsibility to provide certified payroll for all laborers (including subcontractors) name, occupation, and actual hourly wages paid and forwarding that information to the Park District with each progress payment and upon final payment.
4. The Contractor’s Bond must include provision of the faithful performance of the prevailing wage clause as listed on page 13.
5. The legal recourse should the Prevailing Wage Act be violated includes fines for noncompliance as determined by the Department of Labor, (NEW: Sec. 4(b-2), effective January 1, 2010).

IT IS EXPRESSLY UNDERSTOOD THAT THE FOREGOING STATEMENTS AND REPRESENTATIONS AND PROMISES ARE MADE AS A CONDITION TO THE RIGHT OF THE BIDDER TO RECEIVE PAYMENT UNDER AND AWARD MADE UNDER THE TERMS AND PROVISION OF THIS BID.

M. AGREEMENT

This Agreement made this ___________ day of ____________________, 20______, by and between ___________________________________________________, hereinafter called the “CONTRACTOR” and the ARLINGTON HEIGHTS PARK DISTRICT, hereinafter called the “PARK DISTRICT”.

WITNESSETH, that the CONTRACTOR and the PARK DISTRICT for the consideration stated hereinafter agree as follows:

ARTICLE I – SCOPE OF WORK: The CONTRACTOR shall provide all of the materials and perform all of the work described in the specifications entitled:

**Administration Center Parking Lot Improvements**

and in strict accordance with the requirements of all of the component parts of this Agreement as noted under Article V, all of which are attached hereto and made a part hereof.

ARTICLE II – TIME OF COMPLETION: This work to be performed under this agreement shall be commenced May 13, 2019 and shall be completed May 31, 2019. *In the instance of poor weather conditions leading up to commencement of the project, as determined by the Owner, the project will be postponed until August 7, 2019 and shall be completed by August 30, 2019.*

ARTICLE III – CONTRACT PRICE: The PARK DISTRICT shall make payments to the CONTRACTOR for the completed performance of work included in this agreement in compliance with the prices as noted in the CONTRACTOR’S bid and in accord with any subsequent approved agreement change orders subject to all of the provisions of the component parts of this agreement.

ARTICLE IV – COMPLIANCE WITH LAW: The CONTRACTOR shall comply with all statutes, rules and regulations of all Federal, State and Local Agencies having jurisdiction over the proposed improvement at the time the proposal was submitted to the PARK DISTRICT. Any and all costs associated in complying with said statutes, rules and regulations in effect at the time proposals were submitted and due shall be included within the costs of the proposal submitted.

ARTICLE V – COMPLIANCE WITH PREVAILING WAGE ACT: This contract calls for the construction of a “public work,” within the meaning of the Illinois Prevailing Wage Act, 820 ILCS 130/.01-04 et seq. (“the Act”). The Act requires contractors and subcontractors to pay laborers, workers and mechanics performing services on public works projects no less than the “prevailing rate of wages” (hourly cash wages plus fringe benefits) in the county where the work is performed. For information regarding current prevailing wage rates, please refer to the Illinois Department of Labor’s website at: http://www.illinois.gov/idol/Laws-Rules/CONMED/Pages/prevailing-wage-rates.aspx. All contractors and subcontractors rendering services under this contract must comply with all requirements of the Act, including but not limited to, all wage, notice and record keeping duties. The prevailing rate of wages are revised by the Department of Labor and are available on the Department’s official website.

ARTICLE VI – COMPLIANCE WITH ADA: In addition to the obligations set forth in Article IV, the contractor confirms that the materials and/or products listed in the proposal for bid do comply with the
Americans with Disabilities Act, Title II, the ADA Accessibility Guidelines, the Illinois Accessibility Code, and all rules and regulations promulgated with reference thereto. In addition, if the contractor is obligated by this agreement to install the materials and/or products, the contractor shall install the materials and/or products in compliance with the Americans with Disabilities Act, Title II, ADA Accessibility Guidelines, the Illinois Accessibility Code, and all rules and regulations promulgated with reference thereto. All costs of compliance with said statutes, rules and regulations in effect at the time the contractor submitted its bid have been included in the contract price.

ARTICLE VII – COMPONENT PARTS OF THIS AGREEMENT: This agreement consists of the following component parts, all of which are as fully a part of this agreement as if herein set out verbatim, or if not attached, as if attached hereto:

- Instructions to Bidders
- Bid Form
- This Agreement
- Conditions of the Bid
- Anti-Collusion, Sexual Harassment, Illinois Drug Free, Substance Abuse Affidavits and Contractor’s Certification
- Special Conditions
- Addenda, (if any)
- Construction Drawings

In the event that any provisions in any of the above component parts of the agreement conflict with any provision in any other component parts, the provision in the component part last enumerated above shall govern over any other component part which precedes it numerically, except as may otherwise specifically stated.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed in the original counterparts the day and year first above written.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed in three (3) original counterparts the day, month and year first above written.

GENERAL CONDITIONS

1.00 SPECIFICATION and INFORMATION CONFLICTS
Should any specifications, information, directives, notes, tags or provisions contained in the Construction Documents conflict with any other specifications, information, directives, notes, tags or provisions contained in the Construction Documents, then the most stringent specifications, information, directives, notes, tags or provisions shall apply.

1.01 CONSTRUCTION SCHEDULE
Construction will commence May 13, 2019 with a completion date of May 31, 2019. In the instance of poor weather conditions leading up to commencement of the project, as determined by the Owner, the project will be postponed until August 7, 2019 and shall be completed by August 30, 2019.
The Contractor shall submit with the bid proposal a construction plan explaining the process.

1.02 LIMIT of CONSTRUCTION
Construction traffic and staging shall be permitted only within the construction limits as indicated on the plan or as directed by the Owner. The Contractor is responsible for the repair of any areas disturbed inside or outside of this area, at no charge to the Owner.

1.03 CONSTRUCTION STAGING AREA and LIMITS
a. No area has been designated on the site for the staging of construction materials. Bulk materials and equipment shall be permitted only in the construction limits as shown on the plans or as directed by the owner.

b. Construction access shall be permitted only through the access points as determined by the Owner and the successful Contractor. The Contractor shall be responsible for protection of existing flooring, walls, doors, trees, landscaping, etc. and for replacement of any damage, at no additional cost to the Owner.

1.04 WORKMANSHIP
High quality craftsmanship will be expected in all phases of the work. Any elements found unacceptable and not in compliance with the contract documents will be removed and replaced by the Contractor at his expense until satisfactory results are obtained.

1.05 WATER
The Contractor shall be responsible for supplying all water and associated materials for any construction activities including hoses, connectors and miscellaneous appurtenances necessary for water needed for all remaining construction activities. The Contractor may use domestic water sources, such as hose bibs, etc., if available on-site and approved in writing by the Owner. Otherwise, arrangements must be made by the Contractor to furnish all water needed for any construction activities at no expense to the Owner. The Contractor is not allowed to use any utilities from private residences for the project.
1.06 **EXCESS MATERIALS and DEBRIS**

All excess materials and debris, etc. generated by this work shall be considered an incidental item to the Bid and hauled from the site. Large amounts of debris will not be permitted to accumulate on the site and must be hauled from the site on a daily basis.

1.07 **HOURS**

The Contractor shall schedule his normal work between the hours of 7:00 a.m. and 6:00 p.m., Monday through Friday. Work during other hours will be allowed only on an emergency basis and as authorized by the Park District. The Contractor will be allowed to commence May 13, 2019 and upon receipt of the agreement documents and issuance of all pertinent permits.

1.09 **INTERACTION WITH PARK PATRONS**

The Arlington Heights Park District gives priority of use to its park patrons. The Contractor’s vehicles and personnel shall be marked as to be easily identifiable by the park patrons. The work force of the Contractor shall be courteous to park patrons at all times. The work of the Contractor shall not interfere with scheduled events in a park and shall not, within reason, interfere with patrons’ enjoyment of a park area. Any conflict or potential conflict between the work force and park patron shall be reported to the Maintenance Supervisor immediately. Rescheduling of work because of patron use shall not be grounds for failure to comply with frequency of service specified herein.

1.11 **PUBLIC SAFETY**

The Contractor shall not operate machinery in a manner that would in any way endanger park patrons. Contractor will not operate any equipment on Park District property with altered or missing guards or safety equipment.

1.12 **PROTECTION OF UTILITIES**

The Contractor shall protect all utilities from damage, shall immediately contact the appropriate utility if damage should occur and shall be responsible for all claims for damage resulting from Contractor’s operations.

1.13 **CONCURRENT OPERATIONS**

This contract is a non-exclusive contract with the Arlington Heights Park District. The Arlington Heights Park District reserves the right to use other contractors or its own employees to perform work similar to that being performed under the terms of this contract. Performance of work by others shall be construed as being consistent with the terms of this contract and shall not be cause for the Contractor to cease performance of work as directed.

1.14 **CLEAN-UP**

At the end of each day’s work and after completing the improvement, and as may be required by the Park District, the Contractor shall pick up all debris and loose material and remove them from the job site or deposit them in approved refuse containers furnished by the Contractor.
All refuse containers shall be covered and emptied as needed, in order to eliminate blowing refuse at the project site. The Contractor is responsible for the offsite disposal of all debris or excavated materials from this project. Onsite burying of material is not permitted. At the completion of this project, it will be the Contractor’s responsibility to immediately restore any and all areas, services, structures, etc., which may have been damaged due to operations of the Contractor.

If the Contractor fails to clean up and/or restore the site at the completion of the work, the Park District may do so, and the cost thereof shall be charged to the Contractor.

1.15 SITE PROTECTION

The Contractor shall be responsible for adequate job site safety protection. The park area is used daily by the public and adequate protection for park users must be provided.

1.16 DAMAGE TO OTHER WORK

Should the Contractor, his agents or his workers, or any of his subcontractors or material/men cause damage to the Park District, or to the work or materials of other contractors or persons, the damage and the repair or replacement of same shall be the sole responsibility of the Contractor. The repairs and replacing of damaged work shall be under the direction of the Park District, and the cost of same shall be the responsibility of the Contractor.

1.17 TIME OF COMPLETION AND WORK SCHEDULE

The Contractor, as a part of the bid, shall prepare and submit an Estimated Progress Schedule for the work. The progress schedule shall be related to the entire project to the extent required by the bid forms, and shall provide for expeditious and practical execution of the work. The Contractor shall also inform the Park District, who his project superintendent is and set up a pre-construction meeting. The superintendent shall represent the Contractor, and all communications given to the superintendent shall be as binding as if given to the Contractor. Important communications shall be confirmed in writing. Other communications shall be so confirmed on written request in each case.
SECTION 31 10 00 - SITE CLEARING

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:
   1. Protecting existing trees, shrubs, plants, and grass to remain.
   2. Removing existing trees, shrubs, plants, and grass.
   3. Clearing and grubbing.
   4. Stripping and stockpiling topsoil.
   5. Removing above- and below-grade site improvements.
   6. Disconnecting and capping or sealing site utilities.
   7. Temporary erosion and sedimentation control measures.

1.2 MATERIAL OWNERSHIP

A. Except for stripped topsoil or other materials indicated to remain Owner's property, cleared materials shall become Contractor's property and shall be removed from Project site.

1.3 PROJECT CONDITIONS

A. Traffic: Minimize interference with adjoining roads, streets, walks, and other adjacent occupied or used facilities during site-clearing operations.
   1. Do not close or obstruct streets, walks, or other adjacent occupied or used facilities without permission from Owner and authorities having jurisdiction.
   2. Provide alternate routes around closed or obstructed traffic ways if required by authorities having jurisdiction.

B. Salvageable Improvements: Carefully remove items indicated to be salvaged and store on Owner's premises where indicated.

C. Utility Locator Service: Notify utility locator service for area where Project is located before site clearing.

D. Do not commence site clearing operations until temporary erosion and sedimentation control measures are in place.

PART 2 - PRODUCTS

2.1 SOIL MATERIALS

A. Satisfactory Soil Materials: Requirements for satisfactory soil materials are specified in Division 31 Section "Earth Moving".
   1. Obtain approved borrow soil materials off-site when satisfactory soil materials are not available on-site.
PART 3 - EXECUTION

3.1 PREPARATION

A. Protect and maintain benchmarks and survey control points from disturbance during construction.

B. Protect existing site improvements to remain from damage during construction.
   1. Restore damaged improvements to their original condition, as acceptable to Owner.

3.2 TEMPORARY EROSION AND SEDIMENTATION CONTROL

A. Provide temporary erosion and sedimentation control measures to prevent soil erosion and discharge of soil-bearing water runoff or airborne dust to adjacent properties and walkways, according to sediment and erosion control Drawings.

B. Inspect, repair, and maintain erosion and sedimentation control measures during construction until permanent vegetation has been established.

C. Remove erosion and sedimentation controls and restore and stabilize areas disturbed during removal.

3.3 TREE PROTECTION

A. Erect and maintain temporary fencing around tree protection zones before starting site clearing. Remove fence when construction is complete.

B. Do not excavate within tree protection zones, unless otherwise indicated.

C. Repair or replace trees and vegetation indicated to remain that are damaged by construction operations, in a manner approved by Architect.

3.4 UTILITIES

A. Existing Utilities: Do not interrupt utilities serving facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging to provide temporary utility services according to requirements indicated:
   1. Notify Owner not less than two days in advance of proposed utility interruptions.
   2. Do not proceed with utility interruptions without Owner’s written permission.

3.5 CLEARING AND GRUBBING

A. Fill depressions caused by clearing and grubbing operations with satisfactory soil material unless further excavation or earthwork is indicated.
   1. Place fill material in horizontal layers not exceeding a loose depth of 8 inches, and compact each layer to a density required for the proposed condition and as specified in Division 31 Section “Earth Moving”.

3.6 TOPSOIL STRIPPING

A. Remove sod and grass before stripping topsoil.

B. Strip topsoil to whatever depths are encountered in a manner to prevent intermingling with underlying subsoil or other waste materials.
3.7 SITE IMPROVEMENTS

A. Remove existing above- and below-grade improvements as indicated and as necessary to facilitate new construction.

3.8 DISPOSAL

A. Disposal: Remove surplus soil material, unsuitable topsoil, obstructions, demolished materials, and waste materials including trash and debris, and legally dispose of them off Owner's property.
   1. Separate recyclable materials produced during site clearing from other nonrecyclable materials. Store or stockpile without intermixing with other materials and transport them to recycling facilities.

END OF SECTION 31 10 00
1.1 SUMMARY

A. This Section includes the following:
   1. Preparing subgrades for walks, pavements, lawns and grasses and exterior plants.
   2. Base course for concrete walks and pavements.
   3. Base course for asphalt paving.
   4. Excavating and backfilling for utility trenches.

B. Related Sections include the following:
   1. Division 31 Section "Site Clearing" for temporary erosion and sedimentation control measures, site stripping, grubbing, stripping and stockpiling topsoil, and removal of above- and below-grade improvements and utilities.

1.2 UNIT PRICES

A. Unit prices for earthwork are included in Division 01 Section "Unit Prices."

B. Quantity allowances for earthwork are included in Division 01 Section "Allowances."

1.3 DEFINITIONS

A. Backfill: Soil material used to fill an excavation.
   1. Initial Backfill: Backfill placed beside and over pipe in a trench, including haunches to support sides of pipe.
   2. Final Backfill: Backfill placed over initial backfill to fill a trench.

B. Base Course: Course placed between the subbase course and paving.

C. Bedding Course: Course placed over the excavated subgrade in a trench before laying pipe.

D. Borrow Soil: Satisfactory soil imported from off-site for use as fill or backfill.

E. Fill: Soil materials used to raise existing grades.

F. Structures: Modular Block Retaining walls, slabs on-grade (excluding building), tanks, curbs, sewerage, mechanical and electrical appurtenances, or other man-made stationary features constructed above or below the ground surface excluding building.

G. Subbase Course: Course placed between the subgrade and base course for hot-mix asphalt pavement, or course placed between the subgrade and base course for a cement concrete pavement or a cement concrete or hot-mix asphalt walk.

H. Subgrade: Surface or elevation remaining after completing excavation, or top surface of a fill or backfill immediately below base, subbase, or topsoil materials.

I. Utilities: On-site underground pipes, conduits, ducts, and cables.

1.4 SUBMITTALS

A. Product Data: For the following:
   1. Geotextiles.
1.5 QUALITY ASSURANCE

A. Geotechnical Testing Agency Qualifications: An independent testing agency qualified according to ASTM E 329 to conduct soil materials and rock-definition testing, as documented according to ASTM D 3740 and ASTM E 548.
   1. Contractor shall be responsible for contacting the Owner’s Geotechnical Testing Agency at those times required by the specifications for the appropriate materials and soils testing.
   2. Contractor shall coordinate with the Owner’s Geotechnical Testing Agency as to the Testing Agency’s requirements for advance notification, but allow for a minimum 24-hr notification.

1.6 PROJECT CONDITIONS

A. Existing Utilities: Do not interrupt utilities serving facilities occupied by Owner or others unless permitted in writing by Architect and then only after arranging to provide temporary utility services according to requirements indicated.
   1. Notify Owner not less than two days in advance of proposed utility interruptions.
   2. Do not proceed with utility interruptions without Owner’s written permission.
   3. Contact utility-locator service for area where Project is located before excavating.

B. Demolish and completely remove from site existing underground utilities indicated to be removed. Coordinate with utility companies to shut off services if lines are active.

PART 2 - PRODUCTS

2.1 SOIL MATERIALS

A. General: Provide borrow soil materials when sufficient satisfactory soil materials are not available from excavations.

B. Satisfactory Soils: ASTM D 2487 Soil Classification Groups GW, GP, GM, GC, SC, SW, SP, ML, CL and SM, or a combination of these groups; free of rock or gravel larger than 3 inches in any dimension, debris, waste, frozen materials, vegetation, and other deleterious matter.

C. Unsatisfactory Soils: Soil Classification Groups MH, CH, OL, OH, and PT according to ASTM D 2487, or a combination of these groups.
   1. Unsatisfactory soils also include satisfactory soils not maintained within 2 percent of optimum moisture content at time of compaction.
   2. Unsatisfactory soils hereunder are Clean Construction or Demolition Debris (CCDD) as defined by the State of Illinois Environmental Protection Agency and is acceptable as fill material at CCDD facilities.

D. Non-special Waste Containing Soils: Either satisfactory or unsatisfactory soils that contain non-special waste that are non-liquid non-hazardous industrial process and pollution control waste and are excluded from special waste meeting all the requirements of Section 3.475 of the Illinois Environmental Protection Act.
   1. Are not CCDD
   2. Are not hazardous
   3. Are not a liquid (as determined by paint-filter test SW-846 Method 9095)
   4. Are not regulated asbestos-containing material as defined in 40 Code of Federal Regulations, Section 61.141
   5. Do not contain polychlorinated biphenyls (PCBs) regulated in accordance with 40 Code of Federal Regulations, Part 761
   6. Are not formerly hazardous waste rendered non-hazardous
   7. Do not result from shredding recyclable metals
E. Non-Hazardous Special Waste Containing Soils: Either satisfactory or unsatisfactory soils that contain special waste as defined by Illinois Environmental Protection Act (Act) Section 809.103 and that has not been determined as hazardous in that Section of the Act.

F. Hazardous Waste Containing Soils: Either satisfactory or unsatisfactory soils that contain hazardous special waste as defined by Section 3.220 of the Illinois Environmental Protection Act and as determined by Section 722.111 of Title 35 of Illinois Administrative Code.

G. Topsoil: ASTM D 5268, pH range of 5.5 to 7, a minimum of 4 percent organic material content; less than 3 percent stones ¾-inch or larger in any dimension and roots, plants, sod, clay lumps, and other extraneous materials harmful to plant growth.
1. Topsoil shall be free of all deleterious material that may adversely affect the use of the planted surface including any metal, wood, plastic, glass or other manmade materials not intended specifically as a soil supplement.
2. Topsoil shall be free of obnoxious weeds and invasive plants or other undesirable organisms and disease-causing plant pathogens.
3. Topsoil particle sizes shall fall in the following ranges as percentages by mass both separately and in combination:
   a. Clay: 35 percent to 60 percent
   b. Silt: 35 percent to 60 percent
   c. Sand: less than 60 percent
   d. Silt and Clay in combination: less than 65 percent
4. Topsoil Source: Reuse surface soil stockpiled on-site. Verify suitability of stockpiled surface soil to produce topsoil. Clean surface soil of roots, plants, sod, stones, clay lumps, and other extraneous materials harmful to plant growth.
   a. Supplement with imported topsoil from off-site sources when quantities are insufficient. Obtain topsoil displaced from naturally well-drained construction or mining sites where topsoil occurs at least 6 inches deep; do not obtain from bogs or marshes.

H. Subbase Material: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone; ASTM D 2940; conforming to State of Illinois, Dept of Transportation Gradation, CA-7

I. Base Course: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone ASTM D 2940; conforming to State of Illinois, Dept of Transportation Gradation CA-6.

J. Engineered Fill: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone; ASTM D 2940; conforming to State of Illinois, Dept of Transportation Gradation CA-6 or CA-7.

K. Bedding Course: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940; conforming to State of Illinois, Dept of Transportation Gradation per plans.

L. Unsuitable Soil Undercut Area Fill: Per Geotechnical Engineer's Recommendations.

2.2 GEOTEXTILES

A. Geogrid: Biaxial/Triaxial polypropylene material with the following minimum requirements:

   Test Method
   1. Biaxial/Triaxial Aperture size between 0.75-1.5 inches ID calipered
   2. Ultimate. Tensile strength 850lb/ft machine direction GRI GG1(ASTM 6637)
   3. 1300 lb/ft cross-machine direction GRI GG1
   4. Tensile Modulus@5% 12,000 lb./ft machine direction GRI GG1
   5. 18,000 lb/ft cross-mchn. direction GRI GG1
   6. Junction Strength 750 lb./ft min machine direction GRI GG2
   7. 1200 ln/ft cross-machine direction GRI GG2
   8. Flexural Rigidity 200,000 mg-cm machine direction ASTM D1388
PART 3 - EXECUTION

3.1 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities from damage caused by settlement, lateral movement, undermining, washout, and other hazards created by earthwork operations.

B. Preparation of subgrade for earthwork operations including removal of vegetation, topsoil, debris, obstructions, and deleterious materials from ground surface is specified in Division 31 Section “Site Clearing."

C. Protect and maintain erosion and sedimentation controls during earthwork operations.

D. Provide protective insulating materials to protect subgrades and foundation soils against freezing temperatures or frost.

3.2 DEWATERING

A. Prevent surface water and ground water from entering excavations, from ponding on prepared subgrades, and from flooding Project site and surrounding area.

B. Discharge from dewatering operations must meet with local and State National Pollutant Discharge Elimination System (NPDES) requirements.
   1. Incorporate structural and non-structural Best Management Practices (BMP's) as necessary to meet NPDES and local requirements.
   2. Waste material shall be legally disposed of where mechanical means are used to separate sediments and other pollutants from dewatering discharge water.

C. Protect subgrades from softening, undermining, washout, and damage by rain or water accumulation.
   1. Reroute surface water runoff away from excavated areas. Do not allow water to accumulate in excavations. Do not use excavated trenches as temporary drainage ditches.
   2. Install a dewatering system to keep subgrades dry and convey ground water away from excavations. Maintain until dewatering is no longer required.

3.3 EXPLOSIVES

A. Explosives: Do not use explosives.

3.4 EXCAVATION, GENERAL

A. Unclassified Excavation: Excavate to as a minimum to subgrade elevations regardless of the character of surface and subsurface conditions encountered. Where topsoil depth exceeds the proposed subgrade elevation and where within pavement areas, remove all topsoil encountered. Unclassified excavated materials may include rock, soil materials, and obstructions. No changes in the Contract Sum or the Contract Time will be authorized for rock excavation or removal of obstructions.
   1. If excavated materials intended for fill and backfill include unsatisfactory soil materials and rock, replace with satisfactory soil materials.

3.5 EXCAVATION FOR STRUCTURES

A. Excavate to indicated elevations and dimensions within a tolerance of plus or minus 1/2 inch. If applicable, extend excavations a sufficient distance from structures for placing and removing concrete formwork, for installing services and other construction, and for inspections.
3.6 EXCAVATION FOR WALKS AND PAVEMENTS

A. Excavate surfaces under walks and pavements to indicated lines, cross sections, elevations, and subgrades.

3.7 SUBGRADE INSPECTION

A. Notify Owner’s Geotechnical Testing Agency when excavations have reached required subgrade.

B. If Owner’s Geotechnical Testing Agency determines that unsatisfactory soil is present, continue excavation and replace with compacted backfill or fill material as directed.

C. Proof-roll subgrade below the building slabs and pavements with heavy pneumatic-tired equipment to identify soft pockets and areas of excess yielding. Do not proof-roll wet or saturated subgrades.
   1. Completely proof-roll subgrade in one direction, repeating proof-rolling in direction perpendicular to first direction. Limit vehicle speed to 3 mph.
   2. Proof-roll with a loaded 10-wheel, tandem-axle dump truck weighing not less than 15 tons.
   3. Excavate soft spots, unsatisfactory soils, and areas of excessive pumping or rutting, as determined by Architect, and replace with compacted backfill or fill as directed.

D. Authorized additional excavation and replacement material will be paid for according to Contract provisions for changes in the Work.

E. Reconstruct subgrades damaged by freezing temperatures, frost, rain, accumulated water, or construction activities, as directed by Architect, without additional compensation.

3.8 UNAUTHORIZED EXCAVATION

1. Fill unauthorized excavations under other construction or utility pipe as directed by Owner’s Geotechnical Testing Agency.

3.9 STORAGE OF SOIL MATERIALS

A. Stockpile borrow soil materials and excavated satisfactory soil materials without intermixing. Place, grade, and shape stockpiles to drain surface water. Cover to prevent windblown dust.
   1. Stockpile soil materials away from edge of excavations. Do not store within drip line of remaining trees.

3.10 BACKFILL

A. Place and compact backfill in excavations promptly, but not before completing the following:
   1. Surveying locations of underground utilities for Record Documents.
   2. Testing and inspecting underground utilities.
   3. Removing concrete formwork.
   4. Removing trash and debris.
   5. Removing temporary shoring and bracing, and sheeting.
   6. Installing permanent or temporary horizontal bracing on horizontally supported walls.

B. Place backfill on subgrades free of mud, frost, snow, or ice.

3.11 SOIL FILL

A. Plow, scarify, bench, or break up sloped surfaces steeper than 1 vertical to 4 horizontal so fill material will bond with existing material.

B. Place and compact fill material in layers to required elevations as follows:
   1. Under grass and planted areas, use satisfactory soil material.
2. Under walks and pavements, use engineered fill.
3. Under other slabs on grade **excluding buildings**, use engineered fill.

C. Place soil fill on subgrades free of mud, frost, snow, or ice.

### 3.12 SOIL MOISTURE CONTROL

A. Uniformly moisten or aerate subgrade and each subsequent fill or backfill soil layer before compaction to within 2 percent of optimum moisture content.
   1. Do not place backfill or fill material on surfaces that are muddy, frozen, or contain frost or ice.
   2. Remove and replace, or scarify and air dry otherwise satisfactory material that exceeds optimum moisture content by 2 percent and is too wet to compact to specified dry unit weight.

### 3.13 COMPACTION OF BACKFILLS AND FILLS

A. Place backfill and fill materials in layers not more than 8 inches in loose depth for material compacted by heavy compaction equipment, and not more than 4 inches in loose depth for material compacted by hand-operated tampers.
   1. Place backfill for self-compacting CA-7 in layers of 12” maximum for material compacted by heavy compaction equipment or by hand operated tampers.

B. Place backfill and fill materials evenly on all sides of structures **excluding buildings** to required elevations, and uniformly along the full length of each structure.

C. Compact materials to not less than the following percentages of maximum dry density according to ASTM D 1557
   1. Under structures, slabs on grade **excluding building**, and steps scarify and recompact top 12 inches of existing subgrade and each layer of backfill or fill soil material at 95 percent Modified Proctor.
   2. Under pavements, curbs and walks, scarify and recompact top 4 inches of existing subgrade and each layer of backfill or fill soil material at 95 percent Modified Proctor.
   3. Under lawn or unpaved areas compact each layer of backfill or fill soil material at 85 percent Modified Proctor.

### 3.14 GRADING

A. General: Uniformly grade areas to a smooth surface, free of irregular surface changes. Comply with compaction requirements and grade to cross sections, lines, and elevations indicated.
   1. Provide a smooth transition between adjacent existing grades and new grades.
   2. Cut out soft spots, fill low spots, and trim high spots to comply with required surface tolerances.

B. Site Grading: Slope grades to direct water away from buildings and to prevent ponding. Finish subgrades to required elevations within the following tolerances:
   1. Lawn or Unpaved Areas: Plus or minus 1 inch.
   2. Walks: Plus or minus 1/2 inch.
   3. Pavements: Plus or minus 1/2 inch.

### 3.15 BASE COURSE

A. Place base course on subgrades free of mud, frost, snow, or ice.

B. On prepared subgrade, place base course under pavements and walks as follows:
   1. Install geotextile on prepared subgrade according to manufacturer's written instructions, overlapping sides and ends.
   2. Shape base course to required crown elevations and cross-slope grades.
3. Place base course 4 inches or less in compacted thickness in a single layer.
4. Compact base course at optimum moisture content to required grades, lines, cross sections, and thickness to not less than 95 percent of maximum dry unit weight according to ASTM D 1557.

3.16 FIELD QUALITY CONTROL

A. Geotechnical Testing Agency: Owner will engage a qualified independent geotechnical engineering testing agency to perform field quality-control testing.

B. Allow testing agency to inspect and test subgrades and each fill or backfill layer. Proceed with subsequent earthwork only after test results for previously completed work comply with requirements.

C. Testing agency will test compaction of soils in place according to ASTM D 1557 and ASTM D6938, as applicable. Tests will be performed at the following locations and frequencies:
   1. Paved Areas: At subgrade and at each compacted fill and backfill layer, at least 1 test for every 3500 sq. ft. or less of paved area, but in no case fewer than 2 tests.
   2. Trench Backfill: At each compacted initial and final backfill layer, at least 1 test for each 250 feet or less of trench length, but no fewer than 1 tests.

D. When testing agency reports that subgrades, fills, or backfills have not achieved degree of compaction specified, scarify and moisten or aerate, or remove and replace soil to depth required; recompact and retest until specified compaction is obtained.

3.17 PROTECTION

A. Protecting Graded Areas: Protect newly graded areas from traffic, freezing, and erosion. Keep free of trash and debris.

B. Repair and reestablish grades to specified tolerances where completed or partially completed surfaces become eroded, rutted, settled, or where they lose compaction due to subsequent construction operations or weather conditions.
   1. Scarify or remove and replace soil material to depth as directed by Architect; reshape and recompact.

C. Where settling occurs before Project correction period elapses, remove finished surfacing, backfill with additional soil material, compact, and reconstruct surfacing.
   1. Restore appearance, quality, and condition of finished surfacing to match adjacent work, and eliminate evidence of restoration to greatest extent possible.

3.18 DISPOSAL OF SURPLUS AND WASTE MATERIALS

A. Disposal: Remove surplus satisfactory soil and waste material, including unsatisfactory soil, trash, and debris, and legally dispose of it off Owner's property.
   1. Remove waste material, including unsatisfactory soil, trash, and debris, and legally dispose of it off Owner's property.

END OF SECTION 31 20 00
SECTION 321216 - ASPHALT PAVING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:
   1. Cold milling of existing hot-mix asphalt pavement.
   2. Hot-mix asphalt patching.
   3. Hot-mix asphalt paving.
   4. Hot-mix asphalt paving overlay.
   5. Asphalt surface treatments.

B. Related Sections:
   1. Division 31 Section "Earth Moving" for aggregate subbase and base courses and for aggregate pavement shoulders.

1.3 DEFINITION

A. Hot-Mix Asphalt Paving Terminology: Refer to ASTM D 8 for definitions of terms.

1.4 SUBMITTALS

A. Product Data: For each type of product indicated. Include technical data and tested physical and performance properties.
   1. Job-Mix Designs: Certification, by authorities having jurisdiction, of approval of each job mix proposed for the Work.

B. Samples: For each paving fabric, 12 by 12 inches minimum.

C. Material Certificates: For each paving material, from manufacturer.

D. Material Test Reports: For each paving material.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Deliver pavement-marking materials to Project site in original packages with seals unbroken and bearing manufacturer's labels containing brand name and type of material, date of manufacture, and directions for storage.
   1. Store pavement-marking materials in a clean, dry, protected location within temperature range required by manufacturer. Protect stored materials from direct sunlight.

B. Paving Geotextile labeling, shipment and storage shall meet ASTM D4873
1.6 PROJECT CONDITIONS

A. Environmental Limitations: Do not apply asphalt materials if subgrade is wet or excessively damp, if rain is imminent or expected before time required for adequate cure, or if the following conditions are not met:
   1. HMA Temperature: Delivered between 250 deg F and 350 deg F
   2. Prime Coat: Minimum surface temperature of 60 deg F
   3. Asphalt Base Course: Minimum surface temperature of 40 deg F in the shade and rising at time of placement.
   4. Asphalt Surface Course: Minimum surface temperature of 45 deg F in the shade at time of placement and rising at time of placement.

B. Pavement-Marking Paint: Proceed with pavement marking only on clean, dry surfaces and at a minimum ambient or surface temperature of 55 deg F for water-based materials, and not exceeding 95 deg F. When more restrictive, manufacturer limits shall be adhered to.

PART 2 - PRODUCTS

2.1 AGGREGATES

A. General: Use materials and gradations that have performed satisfactorily in previous installations.

B. Coarse Aggregate: ASTM D 692, sound; angular crushed stone, crushed gravel.
   1. Used in Surface Course: IDOT B Quality or better
   2. Used in Binder Course: IDOT C Quality or better

C. Fine Aggregate: ASTM D 1073, sharp-edged natural sand or sand prepared from stone, gravel, or combinations thereof.
   1. For hot-mix asphalt, limit natural sand to a maximum of 20 percent by weight of the total aggregate mass.
   2. Quality: IDOT B Quality or better.

D. Fractionated Reclaimed Asphalt Pavement (FRAP) shall consist of RAP from Class I HMA mixtures. Coarse aggregate in FRAP shall be crushed aggregate and may represent more than one aggregate type and/or quality but shall be at least C quality or as below where more stringent. All FRAP shall be fractionated prior to testing. Testing shall be per and meet all IDOT requirements.
   1. Used in HMA Surface Course, N50: Coarse aggregate quality B or better.
      a. Where FRAP is used alone, or where FRAP/RAS are used in conjunction the Maximum (virgin) Asphalt Binder Replacement (ABR) shall not exceed 20%.
   2. Used in HMA Binder Coarse, N50: Coarse aggregate quality C or better.
      a. Where FRAP is used alone, or where FRAP/RAS are used in conjunction the Maximum (virgin) Asphalt Binder Replacement (ABR) shall not exceed 20%.

E. Mineral Filler: ASTM D 242, rock or slag dust, hydraulic cement, or other inert material.

2.2 ASPHALT MATERIALS

A. Asphalt Binder: AASHTO M 320 and AASHTO MP 1a, PG58-28

B. Prime Coat: ASTM D 2027, medium-curing cutback asphalt matching IDOT MC-30 per Section 1032 of the Standard Specifications for Road and Bridge construction.
C. Tack Coat: IDOT SS-1, SS-1hP, CSS-1, CSS-1hP, emulsified asphalt or cationic emulsified asphalt, slow curing, diluted in water, per Section 1032 of the Standard Specifications for Road and Bridge Construction and of suitable grade and consistency for application.

D. Tack Coat: Where Paving Geotextile as an interlayer is used; Performance Grade asphalt binder of the same grade as the overlaying pavement.

E. Water: Potable.

2.3 AUXILIARY MATERIALS

A. Paving Geotextile (Reflective Crack Control): AASHTO M 288-06, nonwoven polypropylene; resistant to chemical attack, rot, and mildew; and specifically designed for paving applications.
   2. Grab Tensile Strength: ASTM D4632, minimum 101 lbs
   3. Asphalt Retention: ASTM 6140, minimum 0.20 gal/sq. yd.

B. Pavement-Marking Paint: Latex, waterborne emulsion, lead and chromate free, ready mixed, complying with FS TT-P-1952, Type II, with drying time of no more than 15 minutes
   1. Color: Yellow White
   2. Color: Accessible Spaces Yellow
   3. Number of coats: 2.

C. Wheel Stops: Precast, air-entrained concrete, 3500-psi minimum compressive strength. Provide chamfered corners, drainage slots on underside, and holes for anchoring to substrate.
   1. Dowels: Reinforcing Bars: ASTM A 615, Grade 60; deformed

2.4 MIXES

A. Hot-Mix Asphalt: Dense, hot-laid, hot-mix asphalt plant mixes designed according to the Illinois Modified Strategic Highway Research Program criteria and the IDOT Special Provision “Superpave Bituminous Concrete Mixtures”.
   1. Binder Course Mixture N50, IL-19.0, Surface Course Mixture N50, IL-9.5, Mix “D” designed in accordance with Sections 1030 and Sections 406 and 407 of the Standard Specifications for Road and Bridge Construction and the special provision, “Quality Control/Quality Assurance of Bituminous Concrete Mixtures.”
   2. Provide mixes with a history of satisfactory performance in geographical area where Project is located.
   3. All mixes shall be approved by IDOT for use for the current constructions season. Provide verification and approval letter from IDOT for the mixes proposed.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Verify that subgrade is dry and in suitable condition to begin paving.

B. Proof-roll subgrade below pavements with heavy pneumatic-tired equipment to identify soft pockets and areas of excess yielding. Do not proof-roll wet or saturated subgrades.
   1. Completely proof-roll subgrade in one direction, repeating proof-rolling in direction perpendicular to first direction. Limit vehicle speed to 3 mph.
   2. Proof roll with a loaded 10-wheel, tandem-axle dump truck weighing not less than 15 tons.
3. Excavate soft spots, unsatisfactory soils, and areas of excessive pumping or rutting, as determined by Architect, and replace with compacted backfill or fill as directed.

C. Proceed with paving only after unsatisfactory conditions have been corrected.

3.2 COLD MILLING

A. Clean existing pavement surface of loose and deleterious material immediately before cold milling. Remove existing asphalt pavement by cold milling to grades and cross sections indicated.
   1. Mill to a depth of 2 inches.
   2. Mill to a uniform finished surface free of excessive gouges, grooves, and ridges.
      a. When tested with a 16 ft. straightedge maximum variation in surface shall be 3/16 inch.
   3. Control rate of milling to prevent tearing of existing asphalt course.
   4. Repair or replace curbs, manholes, and other construction damaged during cold milling.
      a. Milling method may require different machine or hand method at appurtenances
      b. Repair of damaged curbs or structures and other construction shall be accomplished in a manner satisfactory to the Owner. Where not acceptable, removal and replacement of the damaged appurtenances or construction is required.
   5. Excavate and trim unbound-aggregate base course, if encountered, and keep material separate from milled hot-mix asphalt.
   6. Transport milled hot-mix asphalt to asphalt recycling facility.
   7. Keep milled pavement surface free of loose material and dust.
   8. Milled surface shall be resurfaced within 7 calendar days.

B. Tack Coat: Apply uniformly to vertical surfaces abutting or projecting into new, hot-mix asphalt paving at a rate of 0.05 to 0.15 gal./sq. yd.
   1. Allow tack coat to cure undisturbed before applying hot-mix asphalt paving.
   2. Avoid smearing or staining adjoining surfaces, appurtenances, and surroundings. Remove spillages and clean affected surfaces.

3.3 REPAIRS AND LEVELING

A. Leveling Course: Install and compact leveling course consisting of hot-mix asphalt surface course to level sags and fill depressions deeper than 1 inch in existing pavements.
   1. Install leveling wedges in compacted lifts not exceeding 3 inches thick.

B. Crack and Joint Filling: Remove existing joint filler material from cracks or joints to a depth of 1/4 inch.
   1. Clean cracks and joints in existing hot-mix asphalt pavement.
   2. Use hot-applied joint sealant to seal cracks and joints more than 1/4 inch wide. Fill flush with surface of existing pavement and remove excess.

3.4 SURFACE PREPARATION

A. General: Immediately before placing asphalt materials, remove loose and deleterious material from substrate surfaces. Ensure that prepared subgrade is ready to receive paving.

B. Prime Coat: Apply uniformly over surface of compacted unbound-aggregate base course at a rate of 0.15 to 0.50 gal./sq. yd and per Drawings. Apply enough material to penetrate and seal but not flood surface. Allow prime coat to cure.
   1. If prime coat is not entirely absorbed within 24 hours after application, spread sand over surface to blot excess asphalt. Use enough sand to prevent pickup under traffic.
Remove loose sand by sweeping before pavement is placed and after volatiles have evaporated.

2. Protect primed substrate from damage until ready to receive paving.

C. Tack Coat: Apply uniformly to surfaces of existing pavement at a rate of 0.05 to 0.15 gal./sq. yd.
   1. Allow tack coat to cure undisturbed before applying hot-mix asphalt paving.
   2. Avoid smearing or staining adjoining surfaces, appurtenances, and surroundings. Remove spillages and clean affected surfaces.

3.5 PAVING GEOTEXTILE INSTALLATION

A. Apply tack coat uniformly to existing pavement surfaces at a rate of 0.20 to 0.27 gal./sq. yd. and at the rate specified by the manufacturer to meet the asphalt retention properties of the geotextile and the surface being applied to.

B. Asphalt Binder tack coat shall not exceed 320 deg F. Allow sufficient distance between applicator and fabric installation tractor to achieve temperature specified by the geotextile manufacturer for the application.

C. Application of tack coat shall be by distributor spray bar. Hand spraying shall be kept to a minimum.

D. Place paving geotextile promptly according to manufacturer's written instructions. Broom or roll geotextile smooth and free of wrinkles and folds. Overlap longitudinal joints 4 inches and transverse joints 6 inches.
   1. Protect paving geotextile from traffic and other damage and place hot-mix asphalt paving overlay the same day.

3.6 HOT-MIX ASPHALT PLACING

A. Machine place hot-mix asphalt on prepared surface, spread uniformly, and strike off. Place asphalt mix by hand to areas inaccessible to equipment in a manner that prevents segregation of mix. Place each course to required grade, cross section, and thickness when compacted.
   1. Place hot-mix asphalt base course in number of lifts and thicknesses indicated.
   2. Spread mix at minimum temperature of 250 deg F.
   3. Begin applying mix along centerline of crown for crowned sections and on high side of one-way slopes unless otherwise indicated.
   4. Regulate paver machine speed to obtain smooth, continuous surface free of pulls and tears in asphalt-paving mat.

B. Place paving in consecutive strips not less than 10 feet wide unless infill edge strips of a lesser width are required.
   1. After first strip has been placed and rolled, place succeeding strips and extend rolling to overlap previous strips. Complete a section of asphalt base course before placing asphalt surface course.

C. Promptly correct surface irregularities in paving course behind paver. Use suitable hand tools to remove excess material forming high spots. Fill depressions with hot-mix asphalt to prevent segregation of mix; use suitable hand tools to smooth surface.
3.7 JOINTS

A. Construct joints to ensure a continuous bond between adjoining paving sections. Construct joints free of depressions, with same texture and smoothness as other sections of hot-mix asphalt course.
   1. Clean contact surfaces and apply tack coat to joints.
   2. Offset longitudinal joints, in successive courses, a minimum of 6 inches and not more than 12 inches.
   3. Offset transverse joints, in successive courses, a minimum of 24 inches.
   4. Construct transverse joints at each point where paver ends a day's work and resumes work at a subsequent time. Construct these joints according to AI MS22, for both "Ending a Lane" and "Resumption of Paving Operations."
   5. Compact joints as soon as hot-mix asphalt will bear roller weight without excessive displacement.
   6. Compact asphalt at joints to a density within 2 percent of specified course density.

3.8 COMPACTION

A. General: Begin compaction as soon as placed hot-mix paving will bear roller weight without excessive displacement. Compact hot-mix paving with hot, hand tampers or with vibratory-plate compactors in areas inaccessible to rollers.
   1. Complete compaction before mix temperature cools to 195 deg F.

B. Breakdown Rolling: Complete breakdown or initial rolling immediately after rolling joints and outside edge. Examine surface immediately after breakdown rolling for indicated crown, grade, and smoothness. Correct laydown and rolling operations to comply with requirements.

C. Intermediate Rolling: Begin intermediate rolling immediately after breakdown rolling while hot-mix asphalt is still hot enough to achieve specified density. Continue rolling until hot-mix asphalt course has been uniformly compacted to the following density:
   1. Average Density: 94 percent of reference laboratory density based on AASHTO T 209 and Illinois Modified AASHTO T 166 or "In Place Nuclear Method" according to Illinois Modified ASTM D 2950 but not less than 92 percent nor greater than 96 percent.

D. Finish Rolling: Finish roll paved surfaces to remove roller marks while hot-mix asphalt is still warm.

E. Edge Shaping: While surface is being compacted and finished, trim edges of pavement to proper alignment. Bevel edges while asphalt is still hot; compact thoroughly.

F. Repairs: Remove paved areas that are defective or contaminated with foreign materials and replace with fresh, hot-mix asphalt. Compact by rolling to specified density and surface smoothness.

G. Protection: After final rolling, do not permit vehicular traffic on pavement until it has cooled and hardened.

H. Erect barricades to protect paving from traffic until mixture has cooled enough not to become marked.

3.9 PAVEMENT MARKING

A. Do not apply pavement-marking paint until layout, colors, and placement have been verified with Owner.
B. Allow paving to age for 30 days before starting pavement marking.

C. Sweep and clean surface to eliminate loose material and dust.

D. Apply paint with mechanical equipment to produce pavement markings, of dimensions indicated, with uniform, straight edges. Apply at manufacturer’s recommended rates to provide a minimum wet film thickness of 15 mils.

3.10 WHEEL STOPS

A. Install wheel stops in bed of adhesive as recommended by manufacturer.

B. Securely attach wheel stops to pavement with not less than two galvanized-steel dowels embedded at one-quarter to one-third points. Securely install dowels into pavement and bond to wheel stop. Recess head of dowel beneath top of wheel stop.

3.11 FIELD QUALITY CONTROL

A. Testing Agency: Owner will engage a qualified testing agency to perform tests and inspections.

B. Thickness: In-place compacted thickness of hot-mix asphalt courses will be determined according to ASTM D 3549.

C. Surface Smoothness: Finished surface of each hot-mix asphalt course will be tested for compliance with smoothness tolerances.

D. In-Place Density: Testing agency will take samples of uncompacted paving mixtures and compacted pavement according to AASHTO T 168.
   1. Reference maximum theoretical density will be determined by averaging results from four samples of hot-mix asphalt-paving mixture delivered daily to site, prepared according to ASTM D 2041, and compacted according to job-mix specifications.
   2. Field density of in-place compacted pavement to be determined by “In Place Nuclear Method” according to Illinois Modified ASTM D 2950 and correlated with ASTM D 1188 or ASTM D 2726.
   3. Average Density: 94 percent of reference laboratory density based on AASHTO T 209 and Illinois Modified AASHTO T 166 or “In Place Nuclear Method” according to Illinois Modified ASTM D 2950 but not less than 92 percent nor greater than 96 percent.

E. Replace and compact hot-mix asphalt where core tests were taken.

F. Remove and replace or install additional hot-mix asphalt where test results or measurements indicate that it does not comply with specified requirements.

3.12 DISPOSAL

A. Except for material indicated to be recycled, remove excavated materials from Project site and legally dispose of them in an EPA-approved landfill.
   1. Do not allow milled materials to accumulate on-site.
PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes exterior cement concrete pavement for the following:
   1. Curbs and gutters.
   2. Walkways.

B. Related Sections include the following:
   1. Division 31 Section "Earth Moving" for subgrade preparation, grading, and subbase course.

1.3 DEFINITIONS

A. Cementitious Materials: Portland cement alone or in combination with one or more of blended hydraulic cement, fly ash and other pozzolans, and ground granulated blast-furnace slag.

1.4 SUBMITTALS

A. Product Data: For each type of manufactured material and product indicated.

B. Design Mixtures: For each concrete pavement mixture. Include alternate mixture designs when characteristics of materials, Project conditions, weather, test results, or other circumstances warrant adjustments.

C. Qualification Data: For testing agency.

D. Field quality-control test reports.

E. Testing Agency Qualifications: An independent agency qualified according to ASTM C 1077 and ASTM E 329 for testing indicated, as documented according to ASTM E 548.
   1. Personnel conducting field tests shall be qualified as ACI Concrete Field Testing Technician, Grade 1, according to ACI CP-01 or an equivalent certification program.

G. Concrete Testing Service: Engage a qualified independent testing agency to perform material evaluation tests and to design concrete mixtures.

1.5 PROJECT CONDITIONS

A. Traffic Control: Maintain access for vehicular and pedestrian traffic as required for other construction activities.
PART 2 - PRODUCTS

2.1 FORMS

A. Form Materials: Plywood, metal, metal-framed plywood, or other approved panel-type materials to provide full-depth, continuous, straight, smooth exposed surfaces.
   1. Use flexible or curved forms for curves with a radius 100 feet or less.

B. Form-Release Agent: Commercially formulated form-release agent that will not bond with, stain, or adversely affect concrete surfaces and will not impair subsequent treatments of concrete surfaces.

2.2 STEEL REINFORCEMENT

B. Epoxy-Coated Reinforcing Bars: ASTM A 775 or ASTM A 934; with ASTM A 615, Grade 60 deformed bars.

C. Epoxy-Coated Bar Supports: Bolsters, chairs, spacers, and other devices for spacing, supporting, and fastening reinforcing bars, welded wire reinforcement, and dowels in place. Manufacture bar supports according to CRSI's "Manual of Standard Practice" from steel wire, plastic, or precast concrete of greater compressive strength than concrete, and as follows:
   1. Equip wire bar supports with sand plates or horizontal runners where base material will not support chair legs.
   2. Use epoxy-coated or other dielectric-polymer-coated wire bar supports.

2.3 CONCRETE MATERIALS

A. Cementitious Material: Use the following cementitious materials, of the same type, brand, and source throughout the Project:
   1. Portland Cement: ASTM C 150, Type I, gray, Supplement with the following:
      a. Fly Ash: ASTM C 618, Class F.

B. Normal-Weight Aggregates: ASTM C 33 Class 4S, coarse aggregate, uniformly graded.
   Provide aggregates from a single source.
   2. Fine Aggregate: Free of materials with deleterious reactivity to alkali in cement.

C. Water: ASTM C 94/C 94M.

E. Chemical Admixtures: Provide admixtures certified by manufacturer to be compatible with other admixtures and to contain not more than 0.1 percent water-soluble chloride ions by mass of cementitious material.
   1. Water-Reducing Admixture: ASTM C 494/C 494M, Type A.

2.4 CURING MATERIALS

A. Absorptive Cover: AASHTO M 182, Class 2, burlap cloth made from jute or kenaf, weighing approximately 9 oz./sq. yd. dry.

B. Moisture-Retaining Cover: ASTM C 171, polyethylene film or white burlap-polyethylene sheet.
C. Water: Potable.

2.5 CONCRETE SEALER

A. Waterborne Penetrating Concrete Sealer: USEPA VOC compliant penetrating sealer for concrete:
   1. AASHTO M 224.
   2. Clear, UV resistant, no color change.
   3. Reduction of Water absorption (NCHRP Series II): 75% minimum
   4. Reduction of Chloride Ion absorption (NCHRP Series II): 85% minimum.
   5. Compatible with applied Curing Compound.

2.6 RELATED MATERIALS

2.7 WHEEL STOPS

A. Wheel Stops: Precast, air-entrained concrete, 3500-psi. Provide chamfered corners and drainage slots on underside and holes for anchoring to substrate.
   1. Dowels: Galvanized steel.

2.8 CONCRETE MIXTURES

A. Prepare design mixtures, proportioned according to ACI 301, for each type and strength of normal-weight concrete determined by either laboratory trial mixes or field experience.
   1. Use a qualified independent testing agency for preparing and reporting proposed concrete mixture designs for the trial batch method.

B. Proportion mixtures to provide normal-weight concrete with the following properties:
   2. Maximum Water-Cementitious Materials Ratio at Point of Placement: 0.32-0.42.
   3. Slump Limit: 3 inches, plus or minus 1 inch.

C. Add air-entraining admixture at manufacturer's prescribed rate to result in normal-weight concrete at point of placement having an air content as follows:
   1. Air Content: 5 to 8 percent for 1-inch to 1-1/2-inch nominal maximum aggregate size.

D. Limit water-soluble, chloride-ion content in hardened concrete to 0.15 percent by weight of cement.

E. Chemical Admixtures: Use admixtures according to manufacturer's written instructions.
   1. Use water-reducing and retarding admixture when required by high temperatures, low humidity, or other adverse placement conditions.

F. Cementitious Materials: Limit percentage, by weight, of cementitious materials other than portland cement according to ACI 301 requirements for concrete exposed to deicing chemicals.

2.9 CONCRETE MIXING

A. Ready-Mixed Concrete: Measure, batch, and mix concrete materials and concrete according to ASTM C 94/C and ASTM C 1116. Furnish batch certificates for each batch discharged and used in the Work.
1. When air temperature is between 85 deg F and 90 deg F, reduce mixing and delivery time from 1-1/2 hours to 75 minutes; when air temperature is above 90 deg F, reduce mixing and delivery time to 45 minutes.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine exposed subgrades and subbase surfaces for compliance with requirements for dimensional, grading, and elevation tolerances.

B. Proof-roll prepared subbase surface below concrete pavements with heavy pneumatic-tired equipment to identify soft pockets and areas of excess yielding.
   1. Completely proof-roll subbase in one direction and repeat in perpendicular direction. Limit vehicle speed to 3 mph.
   2. Proof-roll with a loaded 10-wheel tandem-axle dump truck weighing not less than 15 tons.
   3. Subbase with soft spots and areas of pumping or rutting exceeding depth of 1 inch require correction according to requirements in Division 31 Section "Earth Moving."

C. Proceed with concrete pavement operations only after nonconforming conditions have been corrected and subgrade is ready to receive pavement.

3.2 PREPARATION

A. Remove loose material from compacted subbase surface immediately before placing concrete.

3.3 EDGE FORMS AND SCREED CONSTRUCTION

A. Set, brace, and secure edge forms, bulkheads, and intermediate screed guides for pavement to required lines, grades, and elevations. Install forms to allow continuous progress of work and so forms can remain in place at least 24 hours after concrete placement.

B. Clean forms after each use and coat with form-release agent to ensure separation from concrete without damage.

3.4 STEEL REINFORCEMENT

A. General: Comply with CRSI's "Manual of Standard Practice" for fabricating, placing, and supporting reinforcement.

B. Clean reinforcement of loose rust and mill scale, earth, ice, or other bond-reducing materials.

C. Arrange, space, and securely tie bars and bar supports to hold reinforcement in position during concrete placement. Maintain minimum cover to reinforcement.

D. Install welded wire reinforcement in lengths as long as practicable. Lap adjoining pieces at least one full mesh, and lace splices with wire. Offset laps of adjoining widths to prevent continuous laps in either direction.

E. Epoxy-Coated Reinforcement: Use epoxy-coated steel wire ties to fasten epoxy-coated reinforcement. Repair cut and damaged epoxy coatings with epoxy repair coating according to ASTM D 3963/D 3963M.
F. Install fabricated bar mats in lengths as long as practicable. Handle units to keep them flat and free of distortions. Straighten bends, kinks, and other irregularities, or replace units as required before placement. Set mats for a minimum 2-inch overlap of adjacent mats.

3.5 JOINTS

A. General: Form construction, isolation, and contraction joints and tool edgings true to line with faces perpendicular to surface plane of concrete. Construct transverse joints at right angles to centerline, unless otherwise indicated.
   1. When joining existing pavement, place transverse joints to align with previously placed joints, unless otherwise indicated.

B. Construction Joints: Set construction joints at side and end terminations of pavement and at locations where pavement operations are stopped for more than one-half hour unless pavement terminates at isolation joints.
   1. Continue steel reinforcement across construction joints, unless otherwise indicated. Do not continue reinforcement through sides of pavement strips, unless otherwise indicated.
   2. Provide tie bars at sides of pavement strips where indicated.
   3. Butt Joints: Use bonding agent at joint locations where fresh concrete is placed against hardened or partially hardened concrete surfaces.

C. Isolation/Expansion Joints: Form isolation joints of preformed joint-filler strips abutting concrete curbs, catch basins, manholes, inlets, structures, walks, other fixed objects, and where indicated.
   1. Locate expansion joints at intervals of 50 feet, unless otherwise indicated.
   2. Extend joint fillers full width and depth of joint.
   3. Terminate joint filler not less than 1/2 inch or more than 3/4 inch below finished surface if joint sealant is indicated.
   4. Place top of joint filler flush with finished concrete surface if joint sealant is not indicated.
   5. Furnish joint fillers in one-piece lengths. Where more than one length is required, lace or clip joint-filler sections together.
   6. Protect top edge of joint filler during concrete placement with metal, plastic, or other temporary preformed cap. Remove protective cap after concrete has been placed on both sides of joint.

D. Contraction Joints: Form weakened-plane contraction joints, sectioning concrete into areas as indicated. Construct contraction joints for a depth equal to at least one-fourth of the concrete thickness.
   1. Grooved Joints: Form contraction joints after initial floating by grooving and finishing each edge of joint with grooving tool to a 1/4-inch radius. Repeat grooving of contraction joints after applying surface finishes. Eliminate groover marks on concrete surfaces.

E. Edging: Tool edges of pavement, gutters, curbs, and joints in concrete after initial floating with an edging tool to a 1/4-inch radius. Repeat tooling of edges after applying surface finishes. Eliminate tool marks on concrete surfaces.

3.6 CONCRETE PLACEMENT

A. Inspection: Before placing concrete, inspect and complete formwork installation, steel reinforcement, and items to be embedded or cast in. Notify other trades to permit installation of their work.

B. Remove snow, ice, or frost from subbase surface and reinforcement before placing concrete. Do not place concrete on frozen surfaces.
C. Moisten subbase to provide a uniform dampened condition at time concrete is placed. Do not place concrete around manholes or other structures until they are at required finish elevation and alignment.

D. Comply with ACI 301 requirements for measuring, mixing, transporting, and placing concrete.

E. Do not add water to concrete during delivery or at Project site.

F. Do not add water to fresh concrete after testing.

G. Deposit and spread concrete in a continuous operation between transverse joints. Do not push or drag concrete into place or use vibrators to move concrete into place.

H. Consolidate concrete according to ACI 301 by mechanical vibrating equipment supplemented by hand spading, rodding, or tamping.
   1. Consolidate concrete along face of forms and adjacent to transverse joints with an internal vibrator. Keep vibrator away from joint assemblies, reinforcement, or side forms. Use only square-faced shovels for hand spreading and consolidation. Consolidate with care to prevent dislocating reinforcement, dowels, and joint devices.

I. Screed pavement surfaces with a straightedge and strike off.

J. Commence initial floating using bull floats or darbies to impart an open textured and uniform surface plane before excess moisture or bleed water appears on the surface. Do not further disturb concrete surfaces before beginning finishing operations or spreading surface treatments.

K. When adjoining pavement lanes are placed in separate pours, do not operate equipment on concrete until pavement has attained 85 percent of its 28-day compressive strength.

L. Cold-Weather Placement: Comply with ACI 306.1 and as follows. Protect concrete work from physical damage or reduced strength that could be caused by frost, freezing actions, or low temperatures.
   1. When air temperature has fallen to or is expected to fall below 40 deg F, uniformly heat water and aggregates before mixing to obtain a concrete mixture temperature of not less than 50 deg F and not more than 75 deg F at point of placement.
   2. Do not use frozen materials or materials containing ice or snow.
   3. Do not use calcium chloride, salt, or other materials containing antifreeze agents or chemical accelerators unless otherwise specified and approved in mix designs.

M. Hot-Weather Placement: Comply with ACI 301 and as follows when hot-weather conditions exist:
   1. Cool ingredients before mixing to maintain concrete temperature below 90 deg F at time of placement. Chilled mixing water or chopped ice may be used to control temperature, provided water equivalent of ice is calculated to total amount of mixing water. Using liquid nitrogen to cool concrete is Contractor’s option.
   2. Cover steel reinforcement with water-soaked burlap so steel temperature will not exceed ambient air temperature immediately before embedding in concrete.
   3. Fog-spray forms, steel reinforcement, and subgrade just before placing concrete. Keep subgrade moisture uniform without standing water, soft spots, or dry areas.

3.7 FLOAT FINISHING

A. General: Do not add water to concrete surfaces during finishing operations.
B. Float Finish: Begin the second floating operation when bleed-water sheen has disappeared and concrete surface has stiffened sufficiently to permit operations. Float surface with power-driven floats, or by hand floating if area is small or inaccessible to power units. Finish surfaces to true planes. Cut down high spots and fill low spots. Refloat surface immediately to uniform granular texture.

1. Medium-to-Fine-Textured Broom Finish: Draw a soft bristle broom across float-finished concrete surface perpendicular to line of traffic to provide a uniform, fine-line texture.

3.8 CONCRETE PROTECTION AND CURING

A. General: Protect freshly placed concrete from premature drying and excessive cold or hot temperatures.

B. Comply with ACI 306.1 for cold-weather protection.

C. Evaporation Retarder: Apply evaporation retarder to concrete surfaces if hot, dry, or windy conditions cause moisture loss approaching 0.2 lb/sq. ft. x h before and during finishing operations. Apply according to manufacturer’s written instructions after placing, screeding, and bull floating or darbying concrete, but before float finishing.

D. Begin curing after finishing concrete but not before free water has disappeared from concrete surface.

E. Curing Methods: Cure concrete by moisture curing, moisture-retaining-cover curing, curing compound, or a combination of these as follows:

1. Moist Curing: Keep surfaces continuously moist for not less than seven days with the following materials:
   a. Water.
   b. Continuous water-fog spray.
   c. Absorptive cover, water saturated and kept continuously wet. Cover concrete surfaces and edges with 12-inch lap over adjacent absorptive covers.

2. Moisture-Retaining-Cover Curing: Cover concrete surfaces with moisture-retaining cover for curing concrete, placed in widest practicable width, with sides and ends lapped at least 12 inches, and sealed by waterproof tape or adhesive. Immediately repair any holes or tears during curing period using cover material and waterproof tape.

3. Curing Compound: Apply uniformly in continuous operation by power spray or roller according to manufacturer’s written instructions. Recoat areas subjected to heavy rainfall within three hours after initial application. Maintain continuity of coating and repair damage during curing period.

F. Concrete Sealing:

1. Prepare concrete surface in accordance with manufacturer’s recommendations.
2. Concrete Sealer shall be applied within approved temperature ranges per product manufacturer.
3. Allow concrete to age prior sealer application in accordance with manufacturer’s recommendations.
4. Apply uniformly in continuous operation by power spray or roller according to manufacturer’s written instructions. Maintain continuity of coating and repair damage during curing period.

3.9 PAVEMENT TOLERANCES

A. Comply with tolerances of ACI 117 and as follows:

1. Elevation: 1/4 inch.
3. Surface: Gap below 10-foot-long, un leveled straight edge not to exceed 1/4 inch.
4. Lateral Alignment and Spacing of Tie Bars and Dowels: 1 inch.
5. Vertical Alignment of Tie Bars and Dowels: 1/4 inch.
6. Alignment of Tie-Bar End Relative to Line Perpendicular to Pavement Edge: 1/2 in.
7. Alignment of Dowel-Bar End Relative to Line Perpendicular to Pavement Edge: Length of dowel 1/4 inch per 12 inches.
8. Joint Spacing: 3 inches.

3.10 PAVEMENT MARKING

A. Do not apply pavement-marking paint until layout, colors, and placement have been verified with Engineer.
B. Allow concrete pavement to cure for 28 days and be dry before starting pavement marking.
C. Sweep and clean surface to eliminate loose material and dust.
D. Apply paint with mechanical equipment to produce pavement markings of dimensions indicated with uniform, straight edges. Apply at manufacturer's recommended rates to provide a minimum wet film thickness of 15 mils.

3.11 FIELD QUALITY CONTROL

A. Testing Agency: Owner will engage a qualified independent testing and inspecting agency to perform field tests and inspections and prepare test reports.
B. Testing Services: Testing of composite samples of fresh concrete obtained according to ASTM C 172 shall be performed according to the following requirements:
   1. Testing Frequency: Obtain at least 1 composite sample for each 100 cu. Yd. or fraction thereof of each concrete mix placed each day.
      a. When frequency of testing will provide fewer than five compressive-strength tests for each concrete mixture, testing shall be conducted from at least five randomly selected batches or from each batch if fewer than five are used.
   2. Slump: ASTM C 143; one test at point of placement for each composite sample, but not less than one test for each day's pour of each concrete mix. Perform additional tests when concrete consistency appears to change.
   3. Air Content: ASTM C 231, pressure method; one test for each composite sample, but not less than one test for each day's pour of each concrete mix.
   4. Concrete Temperature: ASTM C 1064; one test hourly when air temperature is 40 deg F and below and when 80 deg F and above, and one test for each composite sample.
   5. Compression Test Specimens: ASTM C 31; cast and laboratory cure one set of three standard cylinder specimens for each composite sample.
   6. Compressive-Strength Tests: ASTM C 39/C 39M; test 1 specimen at 7 days and 2 specimens at 28 days.
      a. A compressive-strength test shall be the average compressive strength from 2 specimens obtained from same composite sample and tested at 28 days.
C. Strength of each concrete mix will be satisfactory if average of any 3 consecutive compressive-strength tests equals or exceeds specified compressive strength and no compressive-strength test value falls below specified compressive strength by more than 300 psi.
D. Test results shall be reported in writing to Owner, concrete manufacturer, and Contractor within 48 hours of testing. Reports of compressive-strength tests shall contain Project identification.
name and number, date of concrete placement, name of concrete testing and inspecting agency, location of concrete batch in Work, design compressive strength at 28 days, concrete mixture proportions and materials, compressive breaking strength, and type of break for both 7- and 28-day tests.

E. Nondestructive Testing: Impact hammer, sonoscope, or other nondestructive device may be permitted by Owner but will not be used as sole basis for approval or rejection of concrete.

F. Additional Tests: Testing and inspecting agency shall make additional tests of concrete when test results indicate that slump, air entrainment, compressive strengths, or other requirements have not been met, as directed by Owner.

G. Remove and replace concrete pavement where test results indicate that it does not comply with specified requirements.

H. Additional testing and inspecting, at Contractor’s expense, will be performed to determine compliance of replaced or additional work with specified requirements.

3.12 REPAIRS AND PROTECTION

A. Remove and replace concrete pavement that is broken, damaged, or defective or that does not comply with requirements in this Section.
   1. Remove and replace concrete that is discolored or non-uniform in color.

B. Drill test cores, where directed by Architect, when necessary to determine magnitude of cracks or defective areas. Fill drilled core holes in satisfactory pavement areas with portland cement concrete bonded to pavement with epoxy adhesive.

C. Protect concrete from damage. Exclude traffic from pavement for at least 14 days after placement. When construction traffic is permitted, maintain pavement as clean as possible by removing surface stains and spillage of materials as they occur.

D. Maintain concrete pavement free of stains, discoloration, dirt, and other foreign material. Sweep concrete pavement not more than two days before date scheduled for Substantial Completion inspections.

Attachment AI

INSURANCE REQUIREMENTS
ROUTINE CONSTRUCTION, MAINTENANCE AND REPAIR PROJECTS

Contractor shall obtain insurance of the types and in the amounts listed below.

A. Commercial General and Umbrella Liability Insurance

Contractor shall maintain commercial general liability (CGL) and, if necessary, commercial umbrella insurance with a limit of not less than $1,000,000 each occurrence. If such CGL insurance contains a general aggregate limit, it shall apply separately to this project/location.

CGL insurance shall be written on Insurance Services Office (ISO) occurrence form CG 00 01 10 93, or substitute form providing equivalent coverage, and shall cover liability arising from premises, operations, independent contractors, products-completed operations, personal injury and advertising injury, and liability assumed under an insured contract (including the tort liability of another assumed in a business contract).

Owner shall be included as an insured under the CGL, using ISO additional insured endorsement CG 20 10 or a substitute providing equivalent coverage, and under the commercial umbrella, if any. This insurance shall apply as primary insurance with respect to any other insurance or self-insurance afforded to Owner. Any insurance or self-insurance maintained by Owner shall be excess of the Contractor’s insurance and shall not contribute with it.

There shall be no endorsement or modification of the CGL limiting the scope of coverage for liability arising from pollution, explosion, collapse, or underground property damage.

B. Continuing Completed Operations Liability Insurance

Contractor shall maintain commercial general liability (CGL) and, if necessary, commercial umbrella liability insurance with a limit of not less than $1,000,000 each occurrence for at least three years following substantial completion of the work.

Continuing CGL insurance shall be written on ISO occurrence form CG 00 01 10 93, or substitute form providing equivalent coverage, and shall, at minimum, cover liability arising from products-completed operations and liability assumed under an insured contract.

Continuing CGL insurance shall have a products-completed operations aggregate of at least two times its each occurrence limit. Continuing commercial umbrella coverage, if any, shall include liability coverage for damage to the insured’s completed work equivalent to that provided under ISO form CG 00 01.

C. Business Auto and Umbrella Liability Insurance
Contractor shall maintain business auto liability and, if necessary, commercial umbrella liability insurance with a limit of not less than $1,000,000 each accident. Such insurance shall cover liability arising out of any auto including owned, hired and non-owned autos. Business auto insurance shall be written on Insurance Services Office (ISO) form CA 00 01, CA 00 05, CA 00 12, CA 00 20, or a substitute form providing equivalent liability coverage. If necessary, the policy shall be endorsed to provide contractual liability coverage equivalent to that provided in the 1990 and later editions of CA 00 01.

D. Workers Compensation Insurance

Contractor shall maintain workers compensation as required by statute and employers liability insurance. The commercial umbrella and/or employers liability limits shall not be less than $1,000,000 each accident for bodily injury by accident or $1,000,000 each employee for bodily injury by disease.

If Owner has not been included as an insured under the CGL using ISO additional insured endorsement CG 20 10 under the Commercial General and Umbrella Liability Insurance required in this Contract, the Contractor waives all rights against Owner and its officers, officials, employees, volunteers and agents for recovery of damages arising out of or incident to the Contractor’s work.

E. General Insurance Provisions

1. Evidence of Insurance

Prior to beginning work, Contractor shall furnish Owner with a certificate(s) of insurance and applicable policy endorsement(s), executed by a duly authorized representative of each insurer, showing compliance with the insurance requirements set forth above.

All certificates shall provide for 30 days written notice to Owner prior to the cancellation or material change of any insurance referred to therein. Written notice to Owner shall be by certified mail, return receipt requested.

Failure of Owner to demand such certificate, endorsement or other evidence of full compliance with these insurance requirements or failure of Owner to identify a deficiency from evidence that is provided shall not be construed as a waiver of Contractor’s obligation to maintain such insurance.

Owner shall have the right, but not the obligation, of prohibiting Contractor or any subcontractor from entering the project site until such certificates or other evidence that insurance has been placed in complete compliance with these requirements is received and approved by Owner.

Failure to maintain the required insurance may result in termination of this Contract at Owner’s option.
With respect to insurance maintained after final payment in compliance with a requirement above, an additional certificate(s) evidencing such coverage shall be promptly provided to Owner whenever requested. Contractor shall provide certified copies of all insurance policies required above within 10 days of Owners written request for said copies.

2. Acceptability of Insurers
For insurance companies which obtain a rating from A.M. Best, that rating should be no less than A VII using the most recent edition of the A.M. Best’s Key Rating Guide. If the Best’s rating is less than A VII or a Best’s rating is not obtained, the Owner has the right to reject insurance written by an insurer it deems unacceptable.

3. Cross-Liability Coverage
If Contractor’s liability policies do not contain the standard ISO separation of insureds’ provision, or a substantially similar clause, they shall be endorsed to provide cross-liability coverage.

4. Deductibles and Self-Insured Retentions
Any deductibles or self-insured retentions must be declared to the Owner. At the option of the Owner, the Contractor may be asked to eliminate such deductibles or self-insured retentions as respects the Owner, its officers, officials, employees, volunteers and agents or required to procure a bond guaranteeing payment of losses and other related costs including but not limited to investigations, claim administration and defense expenses.

5. Subcontractors
Contractor shall cause each subcontractor employed by Contractor to purchase and maintain insurance of the type specified above. When requested by the Owner, Contractor shall furnish copies of certificates of insurance evidencing coverage for each subcontractor.

F. Indemnification
To the fullest extent permitted by law, the Contractor shall indemnify and hold harmless the Owner and the Architect and their officers, officials, employees, volunteers and agents from and against all claims, damages, losses and expenses including but not limited to legal fees (attorney’s and paralegals’ fees and court costs), arising out of or resulting from the performance of the Contractor’s work, provided that any such claim, damage, loss or expense (i) is attributable to bodily injury, sickness, disease or death, or injury to or destruction of tangible property, other than the work itself, including the loss of use resulting there from and (ii) is caused in whole or in part by any wrongful or negligent act or omission of the Contractor, any Subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, except to the extent caused in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge, or otherwise reduce any other right or obligation of indemnity which would otherwise exist as to any party or person described in this Paragraph. Contractor shall similarly protect, indemnify and hold and save harmless the Owner, its officers, officials, employees, volunteers and agents against and from
any and all claims, costs, causes, actions and expenses including but not limited to legal fees, incurred by reason of Contractor’s breach of any of its obligations under, or Contractor’s default of, any provision of the Contract.
